# Contents

## About this manual. . . . . iii

## Chapter 1. Safety information. . . . . 1

General safety . . . . .	1
Electrical safety . . . . .	2
Safety inspection guide . . . . .	3
Handling devices that are sensitive to electrostatic discharge. . . . .	3
Grounding requirements . . . . .	4
Safety notices (multilingual translations). . . . .	4

## Chapter 2. Important service information . . . . . 21

Strategy for replacing FRUs . . . . .	21
Strategy for replacing a hard disk drive, a solid-state drive, or an mSATA solid-state drive. . . . .	22
Important notice for replacing a system board . . . . .	22
How to use error message . . . . .	22
Strategy for replacing FRUs for CTO, CMV, and GAV. . . . .	22
Product definition. . . . .	22
FRU identification for CTO, CMV, and GAV products . . . . .	23

## Chapter 3. General checkout . . . . . 25

What to do first . . . . .	25
Checkout guide . . . . .	26
Lenovo Solution Center . . . . .	26
Quick test programs. . . . .	26
UEFI diagnostic program . . . . .	27
Bootable diagnostic programs. . . . .	27
Power system checkout . . . . .	28
Checking the ac power adapter . . . . .	28
Checking operational charging . . . . .	29
Checking the battery pack . . . . .	29
Checking the backup battery . . . . .	29

## Chapter 4. Related service information . . . . . 31

Restoring the factory contents by using Recovery Disc Set . . . . .	31
Using the Windows recovery programs on the Windows 8 operating system . . . . .	32
Passwords . . . . .	33
Power-on password. . . . .	33
Hard-disk password. . . . .	33
Supervisor password . . . . .	34

How to remove the power-on password . . . . .	34
How to remove the hard-disk password . . . . .	34
Power management . . . . .	35
Sleep mode . . . . .	35
Hibernation mode . . . . .	35
Wireless off mode . . . . .	36
Symptom-to-FRU index . . . . .	36
Numeric error codes . . . . .	36
Error messages . . . . .	38
No-beep symptoms . . . . .	38
Beep symptoms . . . . .	38
LCD-related symptoms . . . . .	39
Intermittent problems . . . . .	39
Undetermined problems . . . . .	39

## Chapter 5. Status indicators . . . . . 41

## Chapter 6. Special keys . . . . . 43

## Chapter 7. Locations . . . . . 45

Locating computer controls, connectors, and indicators. . . . .	45
Front view. . . . .	45
Rear view . . . . .	46
Bottom view . . . . .	46
Locating FRUs and CRUs . . . . .	46
Major FRUs and CRUs. . . . .	48
LCD FRUs . . . . .	50
Looking up FRU information . . . . .	51

## Chapter 8. FRU replacement notices . . . . . 53

Screw notices . . . . .	53
Retaining serial numbers. . . . .	54
Restoring the serial number of the system unit . . . . .	54
Retaining the UUID . . . . .	55
Reading or writing the ECA information . . . . .	55

## Chapter 9. Removing or replacing a FRU . . . . . 57

Before servicing the computer . . . . .	58
Disabling the built-in battery . . . . .	58
Removing the SIM card . . . . .	58
1010 Hard disk drive or solid-state drive . . . . .	58
1020 Keyboard . . . . .	60
1030 PCI Express Mini Card for wireless LAN . . . . .	62

1040 PCI Express Mini Card for wireless WAN or mSATA solid-state drive . . . . .	63
1050 Keyboard bezel, backup battery, and speaker assembly . . . . .	66
1060 Battery pack . . . . .	69
1070 Proximity sensors . . . . .	70
1080 Thermal fan assembly and hard disk drive or solid-state drive connector . . . . .	72
1090 LCD unit . . . . .	73
1100 DC-in connector . . . . .	77
1110 System board and base cover assembly . . . . .	78
2010 Button bezel . . . . .	81

2020 LCD panel . . . . .	81
2030 Button board . . . . .	82
2040 Integrated camera . . . . .	83
2050 Hinge . . . . .	84
2060 Wireless antenna assembly, LCD cable assembly, power cable assembly, and LCD rear cover assembly . . . . .	86

<b>Appendix A. Notices . . . . .</b>	<b>89</b>
Electronic emissions notices . . . . .	90
Trademarks . . . . .	90

## About this manual

This manual contains service and reference information for the following ThinkPad® products.

**ThinkPad S230u** Machine Type 3347

Use this manual along with the advanced diagnostic tests to troubleshoot problems.

### **Important:**

This manual is intended only for trained service technicians who are familiar with ThinkPad products. Use this manual along with the advanced diagnostic tests to troubleshoot problems effectively. Before servicing a ThinkPad product, be sure to read all the information under Chapter 1 “Safety information” on page 1 and Chapter 2 “Important service information” on page 21.

---

## Chapter 1. Safety information

This chapter presents following safety information that you need to be familiar with before you service a ThinkPad notebook computer.

- “General safety” on page 1
- “Electrical safety” on page 2
- “Safety inspection guide” on page 3
- “Handling devices that are sensitive to electrostatic discharge” on page 3
- “Grounding requirements” on page 4
- “Safety notices (multilingual translations)” on page 4

---

### General safety

Follow these rules to ensure general safety:

- Observe good housekeeping in the area of the machines during and after maintenance.
- When lifting any heavy object:
  1. Ensure that you can stand safely without slipping.
  2. Distribute the weight of the object equally between your feet.
  3. Use a slow lifting force. Never move suddenly or twist when you attempt to lift.
  4. Lift by standing or by pushing up with your leg muscles; this action removes the strain from the muscles in your back. *Do not attempt to lift any object that weighs more than 16 kg (35 lb) or that you think is too heavy for you.*
- Do not perform any action that causes hazards to the customer, or that makes the equipment unsafe.
- Before you start the machine, ensure that other service technicians and the customer's personnel are not in a hazardous position.
- Place removed covers and other parts in a safe place, away from all personnel, while you are servicing the machine.
- Keep your toolcase away from walk areas so that other people will not trip over it.
- Do not wear loose clothing that can be trapped in the moving parts of a machine. Ensure that your sleeves are fastened or rolled up above your elbows. If your hair is long, fasten it.
- Insert the ends of your necktie or scarf inside clothing or fasten it with a nonconductive clip, about 8 centimeters (3 inches) from the end.
- Do not wear jewelry, chains, metal-frame eyeglasses, or metal fasteners for your clothing.

**Attention:** Metal objects are good electrical conductors.

- Wear safety glasses when you are hammering, drilling, soldering, cutting wire, attaching springs, using solvents, or working in any other conditions that might be hazardous to your eyes.
- After service, reinstall all safety shields, guards, labels, and ground wires. Replace any safety device that is worn or defective.
- Reinstall all covers correctly before returning the machine to the customer.
- Fan louvers on the machine help to prevent overheating of internal components. Do not obstruct fan louvers or cover them with labels or stickers.

---

## Electrical safety

Observe the following rules when working on electrical equipment.

### Important:

Use only approved tools and test equipment. Some hand tools have handles covered with a soft material that does not insulate you when working with live electrical currents.

Many customers have, near their equipment, rubber floor mats that contain small conductive fibers to decrease electrostatic discharges. Do not use this type of mat to protect yourself from electrical shock.

- Find the room emergency power-off (EPO) switch, disconnecting switch, or electrical outlet. If an electrical accident occurs, you can then operate the switch or unplug the power cord quickly.
- Do not work alone under hazardous conditions or near equipment that has hazardous voltages.
- Disconnect all power before:
  - Performing a mechanical inspection
  - Working near power supplies
  - Removing or installing main units
- Before you start to work on the machine, unplug the power cord. If you cannot unplug it, ask the customer to power-off the wall box that supplies power to the machine, and to lock the wall box in the off position.
- If you need to work on a machine that has *exposed* electrical circuits, observe the following precautions:
  - Ensure that another person, familiar with the power-off controls, is near you to switch off the power, if necessary.
  - Use only one hand when working with powered-on electrical equipment; keep the other hand in your pocket or behind your back.

**Attention:** An electrical shock can occur only when there is a complete circuit. By observing the above rule, you can prevent a current from passing through your body.

- When using testers, set the controls correctly and use the approved probe leads and accessories for that tester.
- Stand on suitable rubber mats (obtained locally, if necessary) to insulate you from grounds such as metal floor strips and machine frames.

Observe the special safety precautions when you work with very high voltages; Instructions for these precautions are in the safety sections of maintenance information. Use extreme care when measuring high voltages.

- Regularly inspect and maintain your electrical hand tools for safe operational condition.
- Do not use worn or broken tools and testers.
- *Never assume* that power has been disconnected from a circuit. First, *check* that it has been powered off.
- Always look carefully for possible hazards in your work area. Examples of these hazards are moist floors, nongrounded power extension cables, power surges, and missing safety grounds.
- Do not touch live electrical circuits with the reflective surface of a plastic dental mirror. The surface is conductive; such touching can cause personal injury and machine damage.
- Do not service the following parts *with the power on* when they are removed from their normal operating places in a machine:
  - Power supply units
  - Pumps
  - Blowers and fans
  - Motor generators
  - Similar units to listed above

This practice ensures correct grounding of the units.

- If an electrical accident occurs:

- Use caution; do not become a victim yourself.
- Switch off power.
- Send another person to get medical aid.

---

## Safety inspection guide

The purpose of this inspection guide is to assist you in identifying potentially unsafe conditions. As each machine was designed and built, required safety items were installed to protect users and service technicians from injury. This guide addresses only those items. You should use good judgment to identify potential safety hazards due to attachment of non-ThinkPad features or options not covered by this inspection guide.

If any unsafe conditions are present, you must determine how serious the apparent hazard could be and whether you can continue without first correcting the problem.

Consider these conditions and the safety hazards they present:

- Electrical hazards, especially primary power (primary voltage on the frame can cause serious or fatal electrical shock)
- Explosive hazards, such as a damaged CRT face or a bulging capacitor
- Mechanical hazards, such as loose or missing hardware

To determine whether there are any potentially unsafe conditions, use the following checklist at the beginning of every service task. Begin the checks with the power off, and the power cord disconnected.

Checklist:

1. Check exterior covers for damage (loose, broken, or sharp edges).
2. Power off the computer. Disconnect the power cord.
3. Check the power cord for:
  - a. A third-wire ground connector in good condition. Use a meter to measure third-wire ground continuity for 0.1 ohm or less between the external ground pin and the frame ground.
  - b. The power cord should be the authorized type specified for your computer. Go to: <http://www.lenovo.com/serviceparts-lookup>.
  - c. Insulation must not be frayed or worn.
4. Check for cracked or bulging batteries.
5. Remove the cover.
6. Check for any obvious non-ThinkPad alterations. Use good judgment as to the safety of any non-ThinkPad alterations.
7. Check inside the unit for any obvious unsafe conditions, such as metal filings, contamination, water or other liquids, or signs of fire or smoke damage.
8. Check for worn, frayed, or pinched cables.
9. Check that the power-supply cover fasteners (screws or rivets) have not been removed or tampered with.

---

## Handling devices that are sensitive to electrostatic discharge

Any computer part containing transistors or integrated circuits (ICs) should be considered sensitive to electrostatic discharge (ESD.) ESD damage can occur when there is a difference in charge between objects. Protect against ESD damage by equalizing the charge so that the machine, the part, the work mat, and the person handling the part are all at the same charge.

**Notes:**

1. Use product-specific ESD procedures when they exceed the requirements noted here.
2. Ensure that the ESD protective devices you use have been certified (ISO 9000) as fully effective.

When handling ESD-sensitive parts:

- Keep the parts in protective packages until they are inserted into the product.
- Avoid contact with other people.
- Wear a grounded wrist strap against your skin to eliminate static on your body.
- Prevent the part from touching your clothing. Most clothing is insulative and retains a charge even when you are wearing a wrist strap.
- Use a grounded work mat to provide a static-free work surface. The mat is especially useful when handling ESD-sensitive devices.
- Select a grounding system, such as those listed below, to provide protection that meets the specific service requirement.

**Note:** The use of a grounding system to guard against ESD damage is desirable but not necessary.

- Attach the ESD ground clip to any frame ground, ground braid, or green-wire ground.
- When working on a double-insulated or battery-operated system, use an ESD common ground or reference point. You can use coax or connector-outside shells on these systems.
- Use the round ground prong of the ac plug on ac-operated computers.

---

## Grounding requirements

Electrical grounding of the computer is required for operator safety and correct system function. Proper grounding of the electrical outlet can be verified by a certified electrician.

---

## Safety notices (multilingual translations)

The safety notices in this section are provided in the following languages:

- English
- Arabic
- Brazilian Portuguese
- French
- German
- Hebrew
- Japanese
- Korean
- Spanish
- Traditional Chinese

### DANGER

**Before the computer is powered on after FRU replacement, make sure that all screws, springs, and other small parts are in place and are not left loose inside the computer. Verify this by shaking the computer and listening for rattling sounds. Metallic parts or metal flakes can cause electrical short circuits.**

## DANGER

Some standby batteries contain a small amount of nickel and cadmium. Do not disassemble a standby battery, recharge it, throw it into fire or water, or short-circuit it. Dispose of the battery as required by local ordinances or regulations. Use only the battery in the appropriate parts listing. Use of an incorrect battery can result in ignition or explosion of the battery.

## DANGER

The battery pack contains small amounts of nickel. Do not disassemble it, throw it into fire or water, or short-circuit it. Dispose of the battery pack as required by local ordinances or regulations. Use only the battery in the appropriate parts listing when replacing the battery pack. Use of an incorrect battery can result in ignition or explosion of the battery.

## DANGER

The lithium battery can cause a fire, an explosion, or a severe burn. Do not recharge it, remove its polarized connector, disassemble it, heat it above 100°C (212°F), incinerate it, or expose its cell contents to water. Dispose of the battery as required by local ordinances or regulations. Use only the battery in the appropriate parts listing. Use of an incorrect battery can result in ignition or explosion of the battery.

## DANGER

If the LCD breaks and the fluid from inside the LCD gets into your eyes or on your hands, immediately wash the affected areas with water for at least 15 minutes. Seek medical care if any symptoms from the fluid are present after washing.

## DANGER

To avoid shock, do not remove the plastic cover that protects the lower part of the inverter card.

## DANGER

Though the main batteries have low voltage, a short-circuited or grounded battery can produce enough current to burn personnel or combustible materials.

## DANGER

Unless hot swap is allowed for the FRU being replaced, do as follows before removing it: power off the computer, unplug all power cords from electrical outlets, remove the battery pack, and disconnect any interconnecting cables.

خطر

قبل اعادة تشغيل الحاسب بعد الانتهاء من استبدال FRU، تأكد من أنه قد تم اعادة كل من المسامير و السوست وكل الأجزاء الصغيرة الأخرى في أماكنهم ولم يتم فقدهم داخل الحاسب. ويمكن التحقق من ذلك عن طريق هز الحاسب والاستماع لأي صوت صاخب يصدر منه. قد تؤدي الأجزاء أو الرقائق المعدنية الى حدوث دائرة قصر.

خطر

تحتوي بعض البطاريات الاحتياطية على كمية صغيرة من مادتي النيكل والكادميوم. لا تقم بفك أو اعادة شحن البطارية الاحتياطية ولا تقم أيضا بالقائها في النار أو الماء ولا تتسبب في احدث دائرة قصر بها. قم بالتخلص من البطارية كما هو موضح في القوانين المحلية. استخدم نوع البطارية المحدد والذي يوصى باستخدامه. حيث أنه قد يؤدي استخدام نوع بطارية غير صحيح الى اشتعالها أو انفجارها.

خطر

تحتوي حزمة البطارية على كمية صغيرة من مادة النيكل. لا تقم بفكها أو القاءها في النار أو الماء ولا تتسبب في احدث دائرة قصر بها. تخلص من حزمة البطارية وفقا لما هو موضح في القوانين المحلية. قم، عند استبدال حزمة البطارية، باستخدام الأنواع المحددة فقط والتي يوصى باستخدامها. حيث أنه قد يؤدي استخدام نوع بطارية غير صحيح الى اشتعالها أو انفجارها.

خطر

قد تتسبب بطارية الليثيوم في حدوث حريق أو انفجار أو حدوث حروق شديدة. لا تقم بإعادة شحن البطارية أو إزالة موصل الاستقطاب الخاص بها ولا تحاول أيضا فكها أو تسخينها لأكثر من ١٠٠ درجة مئوية (٢١٢١ فهرنهايت) أو حرقها أو تعريض محتويات الخانة الخاصة بها للماء. قم بالتخلص من البطارية وفقا لما هو موضح في القوانين المحلية. استخدم نوع البطارية المحدد والذي يوصى باستخدامه. حيث أنه قد يؤدي استخدام نوع بطارية غير صحيح الى اشتعالها أو انفجارها.

إذا ما انكسرت شاشة LCD ولامس السائل الداخلي عينيك أو يديك، قم في الحال بغسلهما بالماء لمدة لا تقل عن ١٥ دقيقة. إذا ما وجدت أي أعراض بعد الغسل اطلب عندئذ المساعدة الطبية.

لتجنب التعرض لأي صدمات، لا تقم بإزالة الغطاء البلاستيكي الذي يحمي الجزء الأسفل من بطاقة العاكس.

على الرغم من أن البطاريات الرئيسية يكون لها جهد منخفض، إلا أنه قد تقوم البطاريات التي حدث قصور بها أو التي تم توصيلها أرضيا بإصدار تيار يكفي لحدوث حروق للأفراد أو تعرض المواد القابلة للاشتعال للحريق.

ما لم يتم السماح بالتبديل الفوري لأي FRU الجاري استبداله بدون ضرورة إغلاق النظام، قم بتنفيذ ما يلي قبل إزالته: قم بإيقاف تشغيل الحاسب ونزع كل أسلاك الطاقة من المخارج الكهربائية وقم أيضا بإزالة حزمة البطارية ثم قم بفصل أي كابلات متصلة.

## PERIGO

Antes de ligar o computador após a substituição da FRU, certifique-se de que todos os parafusos, molas e outras peças pequenas estejam no lugar e não estejam soltos dentro do computador. Verifique isso sacudindo o computador e procurando ouvir sons de peças soltas. Peças metálicas ou lascas de metal podem causar curto-circuito.

## PERIGO

Algumas baterias reserva contêm uma pequena quantidade de níquel e cádmio. Não desmonte uma bateria reserva, recarregue-a, jogue-a no fogo ou na água, ou deixe-a entrar em curto-circuito. Descarte a bateria conforme requerido pelas leis ou regulamentos locais. Use somente a bateria nas partes listadas apropriadas. O uso de uma bateria incorreta pode resultar em combustão ou explosão da bateria.

## PERIGO

O pacote da bateria contém uma pequena quantidade de níquel. Não o desmonte, jogue-o no fogo ou na água, ou deixe-o entrar em curto-circuito. Descarte o pacote da bateria conforme requerido pelas leis ou regulamentos locais. Use somente a bateria nas partes listadas apropriadas ao substituir o pacote da bateria. O uso de uma bateria incorreta pode resultar em combustão ou explosão da bateria.

## PERIGO

A bateria de lítio pode causar incêndio, explosão ou graves queimaduras. Não a recarregue, remova seu conector polarizado, desmonte-a, aqueça-a acima de 100°C (212°F), incinere-a, ou exponha o conteúdo de sua célula à água. Descarte a bateria conforme requerido pelas leis ou regulamentos locais. Use somente a bateria nas partes listadas apropriadas. O uso de uma bateria incorreta pode resultar em combustão ou explosão da bateria.

## PERIGO

Se o LCD quebrar e o fluido de dentro dele entrar em contato com seus olhos ou com suas mãos, lave as áreas afetadas imediatamente com água durante pelo menos 15 minutos. Procure cuidados médicos se algum sintoma causado pelo fluido surgir após a lavagem.

## PERIGO

Para evitar choque elétrico, não remova a capa plástica que protege a parte inferior da placa inversora.

#### PERIGO

Embora as principais baterias possuam baixa voltagem, uma bateria em curto-circuito ou aterrada pode produzir corrente o bastante para queimar materiais de pessoal ou inflamáveis.

#### PERIGO

A menos que uma hot swap seja permitida para a FRU que está sendo substituída, faça o seguinte antes de removê-la: desligue o computador, desconecte todos os cabos de energia das tomadas, remova o pacote de baterias e desconecte quaisquer cabos de interconexão.

#### DANGER

Avant de remettre l'ordinateur sous tension après remplacement d'une unité en clientèle, vérifiez que tous les ressorts, vis et autres pièces sont bien en place et bien fixées. Pour ce faire, secouez l'unité et assurez-vous qu'aucun bruit suspect ne se produit. Des pièces métalliques ou des copeaux de métal pourraient causer un court-circuit.

#### DANGER

Certaines batteries de secours contiennent du nickel et du cadmium. Ne les démontez pas, ne les rechargez pas, ne les exposez ni au feu ni à l'eau. Ne les mettez pas en court-circuit. Pour les mettre au rebut, conformez-vous à la réglementation en vigueur. Lorsque vous remplacez la pile de sauvegarde ou celle de l'horloge temps réel, veillez à n'utiliser que les modèles cités dans la liste de pièces détachées adéquate. Une batterie ou une pile inappropriée risque de prendre feu ou d'exploser.

#### DANGER

La batterie contient du nickel. Ne la démontez pas, ne l'exposez ni au feu ni à l'eau. Ne la mettez pas en court-circuit. Pour la mettre au rebut, conformez-vous à la réglementation en vigueur. Lorsque vous remplacez la batterie, veillez à n'utiliser que les modèles cités dans la liste de pièces détachées adéquate. En effet, une batterie inappropriée risque de prendre feu ou d'exploser.

## DANGER

La pile de sauvegarde contient du lithium. Elle présente des risques d'incendie, d'explosion ou de brûlures graves. Ne la rechargez pas, ne retirez pas son connecteur polarisé et ne la démontez pas. Ne l'exposez pas à une température supérieure à 100°C, ne la faites pas brûler et n'en exposez pas le contenu à l'eau. Mettez la pile au rebut conformément à la réglementation en vigueur. Une pile inappropriée risque de prendre feu ou d'exploser.

## DANGER

Si le panneau d'affichage à cristaux liquides se brise et que vous recevez dans les yeux ou sur les mains une partie du fluide, rincez-les abondamment pendant au moins quinze minutes. Consultez un médecin si des symptômes persistent après le lavage.

## DANGER

Afin d'éviter tout risque de choc électrique, ne retirez pas le cache en plastique protégeant la partie inférieure de la carte d'alimentation.

## DANGER

Bien que le voltage des batteries principales soit peu élevé, le court-circuit ou la mise à la masse d'une batterie peut produire suffisamment de courant pour brûler des matériaux combustibles ou causer des brûlures corporelles graves.

## DANGER

Si le remplacement à chaud n'est pas autorisé pour l'unité remplaçable sur site que vous remplacez, procédez comme suit avant de retirer l'unité : mettez l'ordinateur hors tension, débranchez tous les cordons d'alimentation des prises de courant, retirez le bloc de batterie et déconnectez tous les câbles d'interconnexion.

## VORSICHT

Bevor nach einem FRU-Austausch der Computer wieder angeschlossen wird, muß sichergestellt werden, daß keine Schrauben, Federn oder andere Kleinteile fehlen oder im Gehäuse vergessen wurden. Der Computer muß geschüttelt und auf Klappergeräusche geprüft werden. Metallteile oder -splitter können Kurzschlüsse erzeugen.

#### **VORSICHT**

Die Bereitschaftsbatterie, die sich unter dem Diskettenlaufwerk befindet, kann geringe Mengen Nickel und Cadmium enthalten. Sie darf nur durch die Verkaufsstelle oder den IBM Kundendienst ausgetauscht werden. Sie darf nicht zerlegt, wiederaufgeladen, kurzgeschlossen, oder Feuer oder Wasser ausgesetzt werden. Die Batterie kann schwere Verbrennungen oder Verätzungen verursachen. Bei der Entsorgung die örtlichen Bestimmungen für Sondermüll beachten. Beim Ersetzen der Bereitschafts- oder Systembatterie nur Batterien des Typs verwenden, der in der Ersatzteilliste aufgeführt ist. Der Einsatz falscher Batterien kann zu Entzündung oder Explosion führen.

#### **VORSICHT**

Akkus enthalten geringe Mengen von Nickel. Sie dürfen nicht zerlegt, wiederaufgeladen, kurzgeschlossen, oder Feuer oder Wasser ausgesetzt werden. Bei der Entsorgung die örtlichen Bestimmungen für Sondermüll beachten. Beim Ersetzen der Batterie nur Batterien des Typs verwenden, der in der Ersatzteilliste aufgeführt ist. Der Einsatz falscher Batterien kann zu Entzündung oder Explosion führen.

#### **VORSICHT**

Die Systembatterie ist eine Lithiumbatterie. Sie kann sich entzünden, explodieren oder schwere Verbrennungen hervorrufen. Batterien dieses Typs dürfen nicht aufgeladen, zerlegt, über 100°C erhitzt oder verbrannt werden. Auch darf ihr Inhalt nicht mit Wasser in Verbindung gebracht oder der zur richtigen Polung angebrachte Verbindungsstecker entfernt werden. Bei der Entsorgung die örtlichen Bestimmungen für Sondermüll beachten. Beim Ersetzen der Batterie nur Batterien des Typs verwenden, der in der Ersatzteilliste aufgeführt ist. Der Einsatz falscher Batterien kann zu Entzündung oder Explosion führen.

#### **VORSICHT**

Die Leuchtstoffröhre im LCD-Bildschirm enthält Quecksilber. Bei der Entsorgung die örtlichen Bestimmungen für Sondermüll beachten. Der LCD-Bildschirm besteht aus Glas und kann zerbrechen, wenn er unsachgemäß behandelt wird oder der Computer auf den Boden fällt. Wenn der Bildschirm beschädigt ist und die darin befindliche Flüssigkeit in Kontakt mit Haut und Augen gerät, sollten die betroffenen Stellen mindestens 15 Minuten mit Wasser abgespült und bei Beschwerden anschließend ein Arzt aufgesucht werden.

#### VORSICHT

Aus Sicherheitsgründen die Kunststoffabdeckung, die den unteren Teil der Spannungswandlerplatine umgibt, nicht entfernen.

#### VORSICHT

Obwohl Hauptbatterien eine niedrige Spannung haben, können sie doch bei Kurzschluß oder Erdung genug Strom abgeben, um brennbare Materialien zu entzünden oder Verletzungen bei Personen hervorzurufen.

#### VORSICHT

Wenn ein Austausch der FRU bei laufendem Betrieb nicht erlaubt ist, gehen Sie beim Austausch der FRU wie folgt vor: Schalten Sie den Computer aus, ziehen Sie alle Netzkabel von den Netzsteckdosen ab, entfernen Sie den Akku und ziehen Sie alle miteinander verbundenen Kabel ab.

סכנה

לפני הפעלת המחשב לאחר החלפת FRU יש לוודא שכל הברגים, הקפיצים, וחלקים קטנים אחרים נמצאים במקומם ואינם חופשיים לזוז בתוך המחשב. כדי לוודא זאת, יש לטלטל את המחשב ולחקש לבגילוי קולות שקשוק. חלקי או שבבי מתכת עלולים לגרום לקצרים חשמליים.

סכנה

סוללות המתנה מסוימות מכילות כמות קטנה של ניקל וקדמיום. אין לפרק סוללת המתנה, לטעון אותה מחדש, להשליך אותה לאש או למים או לקצר אותה. יש לסלק את הסוללה כנדרש על ידי התקנות והחוקים המקומיים. יש להשתמש רק בסוללה המופיעה ברשימת החלקים המתאימה. שימוש בסוללה לא מתאימה עלול לגרום להצתה או התפוצצות של הסוללה.

סכנה

מארז הסוללה מכיל כמות קטנה של ניקל וקדמיום. אין לפרק את מארז הסוללה, להשליך אותו לאש או למים או לקצר אותו. יש לסלק את מארז הסוללה כנדרש על ידי התקנות והחוקים המקומיים. יש להשתמש רק בסוללה המופיעה ברשימת החלקים המתאימה בזמן החלפת מארז הסוללה. שימוש בסוללה לא מתאימה עלול לגרום להצתה או התפוצצות של הסוללה.

סכנה

סוללת הליתיום עלולה לגרום לשריפה, להתפוצצות או לכוויות קשות. אין לטעון אותה מחדש, לסלק את המחבר המקוטב שלה, לפרק אותה או לחמם אותה לטמפרטורה העולה על 100 מעלות צלזיוס. אין לשרוף את הסוללה ואין לחשוף את תוכן התא למים. יש לסלק את הסוללה בנדרש בתקנות ובחוקים המקומיים. יש להשתמש רק בסוללה המופיעה ברשימת החלקים המתאימים. שימוש בסוללה אחרת עלול לגרום לסכנת שריפה או התפוצצות.

סכנה

אם מסך הגביש הנוזלי (LCD) נשבר וחוזל מתוך המסך בא במגע עם עיניכם או ידיכם, שטפו את האזורים הנגועים מיד במים במשך 15 דקות לפחות. פנו לקבלת עזרה רפואית אם תסמינים חנוכיים מהמגע עם הנוזל נמשכים לאחר השטיפה.

סכנה

כדי למנוע התחשמלות, אין להסיר את מכסה הפלסטיק המגן על חלקו התחתון של הכרטיס ההפוך.

סכנה

אף שהסוללות הראשיות הן בעלות מתח נמוך, סוללה מקוצרת או מוארכת עלולה להפיק זרם מספיק לגרימת כוויות או להצתת חומרים דליקים.

סכנה

אלא אם כן מותרת 'החלפה חמה' של ה-FRU המוחלף, פעלו כדלהלן לפני הסרתו: כבו את המחשב, נתקו את כל כבלי החשמל מהשקעים, הוציאו את מארז הסוללות ונתקו את כל הכבלים המחברים.

危険

FRUの交換後、ThinkPadの電源を入れる前に、ねじ、バネ、その他の小さな部品がすべて正しい位置にあり、またThinkPadの内部で緩んでいないことを確認してください。  
これを確認するには、ThinkPadを振って、カチャカチャと音がしないか確かめます。金属部品や金属破片はショートの原因になることがあります。

危険

予備バッテリーの中には少量のニッケルとカドミウムが含まれているものがあります。したがって、予備バッテリーの分解、再充電、火または水の中への投棄、またはショートさせることは決して行わないでください。バッテリーを廃棄する場合は地方自治体の条例に従ってください。適切なパーツ・リストにあるバッテリーだけを使用してください。誤ったバッテリーを使用すると、バッテリーが発火したり、爆発したりすることがあります。

バッテリー・パックには少量のニッケルが含まれています。バッテリー・パックを分解したり、火または水の中に投げ込んだり、ショートさせないでください。バッテリー・パックの廃棄にあたっては、地方自治体の条例または規則に従ってください。バッテリー・パックを交換するときは、適切なパーツ・リストにあるバッテリーだけを使用してください。誤ったバッテリーを使用すると、バッテリーが発火したり、爆発したりすることがあります。

リチウム・バッテリーは、火災、爆発、または重症のやけどを引き起こすことがあります。バックアップ・バッテリーの充電、その極性コネクタの取り外し、バッテリー本体の分解、100 °C (212 °F) 以上への加熱、焼却、電池の中身を水に浸すことはしないでください。バッテリーを廃棄する場合は地方自治体の条例に従ってください。適切なパーツ・リストにあるバッテリーだけを使用してください。誤ったバッテリーを使用すると、バッテリーが発火したり、爆発したりすることがあります。

LCD が破損し、LCD 中の液体が目に入ったり、手に触れたりした場合は、液体が触れた部分を少なくとも 15 分間洗い流してください。洗い流した後に、液体によって何らかの症状が現れた場合は、医師の治療を受けてください。

感電を防ぐため、インバーター・カードの下部を保護しているプラスチック・カバーを外さないでください。

メイン・バッテリーの電圧は低くても、ショートしたり、接地したバッテリーが、作業者にやけどを負わせたり、可燃物を燃やすだけの電流を発生させる場合があります。

危険

交換しようとしている FRU がホット・スワップに対応していない場合、それを取り外す前に、コンピューターの電源をオフにし、すべての電源コードをコンセントから抜き、バッテリー・パックを取り外して、相互接続しているケーブルをすべて切り離してください。

위험

FRU를 교체하고 나서 컴퓨터 전원을 켜기 전에 모든 나사, 스프링 및 기타 작은 부품들이 올바른 위치에 있는지, 컴퓨터 내부에 단단하게 연결되어 있는지 확인하십시오. 컴퓨터를 흔들어 달각거리는 소리가 나지 않는지 확인하십시오. 금속 부품 또는 금속 조각은 누전을 일으킬 수 있습니다.

위험

일부 보조 배터리에는 소량의 니켈 및 카트륨이 포함되어 있습니다. 보조 배터리를 분해하거나, 다시 충전하거나, 불 또는 물에 던지거나, 단락시키지 마십시오. 배터리 팩을 폐기할 때에는 해당 지역의 법률 규정을 따르십시오. 배터리 팩을 교체할 때에는 올바른 배터리만 사용하십시오. 올바르지 않은 배터리를 사용하면 배터리가 발화되거나 폭발할 수 있습니다.

위험

배터리 팩에는 소량의 니켈이 포함되어 있습니다. 배터리 팩을 분해하거나, 불 또는 물에 던지거나, 단락시키지 마십시오. 배터리 팩을 폐기할 때에는 해당 지역의 법률 규정을 따르십시오. 배터리 팩을 교체할 때에는 올바른 배터리만 사용하십시오. 올바르지 않은 배터리를 사용하면 배터리가 발화되거나 폭발할 수 있습니다.

위험

리튬 배터리는 화재, 폭발 또는 심각한 화상을 일으킬 수 있습니다. 리튬 배터리를 다시 충전하거나, 극성 커넥터를 제거하거나, 분해하거나, 100C(212F) 이상으로 가열하거나, 소각하거나, 전지 내용물을 물에 노출시키지 마십시오. 배터리를 폐기할 때에는 해당 지역을 법률 규정을 따르십시오. 올바른 배터리만 사용하십시오. 올바르지 않은 배터리를 사용하면 배터리가 발화되거나 폭발할 수 있습니다.

위험

LCD가 파손되어 LCD 내부의 액체가 눈에 들어가거나 손에 묻으면 즉시 깨끗한 물로 15분 이상 닦아 내십시오. 씻은 후에 조금이라도 이상을 느낀다면 즉시 병원에 가서 의사의 진찰을 받아야 합니다.

위험

전기적 위험을 방지하려면 인버터 카드의 아래 부분을 보호하는 플라스틱 덮개를 제거하지 마십시오.

위험

기본 배터리의 전압은 낮지만, 단락되거나 접지된 배터리는 화상을 입히기에 충분한 전류와 가연성 물질을 발생시킬 수 있습니다.

위험

FRU 교체 시 Hot Swap이 지원되지 않는 경우, FRU를 제거하기 전에 컴퓨터의 전원을 끄고, 전기 콘센트에서 전원 코드를 분리하고, 배터리를 제거한 후, 연결된 모든 케이블을 분리하십시오.

PELIGRO

Antes de encender el sistema despues de sustituir una FRU, compruebe que todos los tornillos, muelles y demás piezas pequeñas se encuentran en su sitio y no se encuentran sueltas dentro del sistema. Compruébelo agitando el sistema y escuchando los posibles ruidos que provocarían. Las piezas metálicas pueden causar cortocircuitos eléctricos.

PELIGRO

Algunas baterías de reserva contienen una pequeña cantidad de níquel y cadmio. No las desmonte, ni recargue, ni las eche al fuego o al agua ni las cortocircuite. Deséchelas tal como dispone la normativa local. Utilice sólo baterías que se encuentren en la lista de piezas. La utilización de una batería no apropiada puede provocar la ignición o explosión de la misma.

PELIGRO

Las baterías contienen pequeñas cantidades de níquel. No las desmonte, ni recargue, ni las eche al fuego o al agua ni las cortocircuite. Deséchelas tal como dispone la normativa local. Utilice sólo baterías que se encuentren en la lista de piezas al sustituir la batería. La utilización de una batería no apropiada puede provocar la ignición o explosión de la misma.

PELIGRO

La batería de repuesto es una batería de litio y puede provocar incendios, explosiones o quemaduras graves. No la recargue, ni quite el conector polarizado, ni la desmonte, ni caliente por encima de los 100°C (212°F), ni la incinere ni exponga el contenido de sus celdas al agua. Deséchela tal como dispone la normativa local.

PELIGRO

Si la LCD se rompe y el fluido de su interior entra en contacto con sus ojos o sus manos, lave inmediatamente las áreas afectadas con agua durante 15 minutos como mínimo. Obtenga atención médica si se presenta algún síntoma del fluido después de lavarse.

PELIGRO

Para evitar descargas, no quite la cubierta de plástico que rodea la parte baja de la tarjeta invertida.

PELIGRO

Aunque las baterías principales tienen un voltaje bajo, una batería cortocircuitada o con contacto a tierra puede producir la corriente suficiente como para quemar material combustible o provocar quemaduras en el personal.

PELIGRO

Salvo que se permita el intercambio en caliente para la unidad sustituible localmente, realice lo siguiente antes de extraerla: apague el sistema, desconecte todos los cables de alimentación de las tomas de alimentación eléctrica, extraiga la batería y desconecte los cables de interconexión.

危險

完成 FRU 更換之後，在開啟電腦的電源之前，請確定所有螺絲、彈簧及其他小零件都已歸位，沒有遺留在電腦內部。  
若要確認這一點，請搖晃電腦，聽聽看是否有卡嗒的聲響。  
金屬零件或儀錶的火花會造成電線短路。

危險

部分備用電池含有微量的鎳和鎘。請勿拆開備用電池、再充電、丟入火或水中，或使其形成短路。請按照當地法令或規定來棄置電池。

僅限使用零件清單中的電池。使用不適當的電池會導致電池起火或爆炸。

電池套件含有微量的鎳。請勿拆開電池套件、丟入火或水中，或使其形成短路。請按照當地法令或規定來棄置電池套件。

更換電池套件時，僅限使用零件清單中的電池。使用不適當的電池會導致電池起火或爆炸。

鋰電池會導致起火、爆炸或嚴重燒傷。請勿再充電、拔除其電極接頭、拆開、加熱超過 **100°C (212°F)**、焚燒，或讓電池組成物浸到水。請按照當地法令或規定來棄置電池。

僅限使用零件清單中的電池。使用不適當的電池會導致電池起火或爆炸。

如果 LCD 破裂導致 LCD 流出的液體沾到您的眼睛或手，請立即以清水沖洗沾染部位至少 15 分鐘。如果在清洗後出現該液體所造成的任何症狀，請就醫治療。

**為避免電擊，請勿拆下轉換卡下面的塑膠護蓋。**

雖然主電池的電壓很低，但短路或接地電池所產生的電流，仍足以使人燒傷或使可燃物質起火。

除非 FRU 允許以熱抽換來替換，否則請依下列方式將其移除：將電腦關機，拔除插座上所有電源線，移除電池包，並拔開任何交互連接的線材。

---

## Chapter 2. Important service information

This chapter presents following important service information that applies to all machine types supported by this manual:

- “Strategy for replacing FRUs” on page 21
  - “Strategy for replacing a hard disk drive, a solid-state drive, or an mSATA solid-state drive” on page 22
  - “Important notice for replacing a system board” on page 22
  - “How to use error message” on page 22
- “Strategy for replacing FRUs for CTO, CMV, and GAV” on page 22
  - “Product definition” on page 22
  - “FRU identification for CTO, CMV, and GAV products” on page 23

### Important:

- Advise customers to contact the Lenovo Customer Support Center if they need any assistance in obtaining or installing any software fixes, drivers, and UEFI BIOS downloads. Telephone numbers for Lenovo Support are available at:  
<http://www.lenovo.com/support/phone>
- System Disassembly/Reassembly videos that show the FRU removals or replacements for the Lenovo® authorized service technicians are available in the following support site:  
<http://www.lenovoservicetraining.com/ion/>

---

## Strategy for replacing FRUs

### Before replacing parts:

Ensure that all software fixes, drivers, and UEFI BIOS downloads are installed before replacing any FRUs listed in this manual.

After a system board is replaced, ensure that the latest UEFI BIOS is loaded to the system board before completing the service action.

To download software fixes, drivers, and UEFI BIOS, do as follows:

1. Go to <http://www.lenovo.com/support>.
2. Enter the product number of the computer or press the Run Auto-Detect button on the screen.
3. Select **Drivers & Software**.
4. Follow the directions on the screen and install the necessary software.

Use the following strategy to prevent unnecessary expense for replacing and servicing FRUs:

- **If you are instructed to replace a FRU but the replacement does not correct the problem, reinstall the original FRU before you continue.**
- Some computers have both a processor board and a system board. If you are instructed to replace either the processor board or the system board, and replacing one of them does not correct the problem, reinstall that board, and then replace the other one.
- If an adapter or a device consists of more than one FRU, any of the FRUs might be the cause of the error. Before replacing the adapter or device, remove the FRUs, one by one, to see if the symptoms change. Replace only the FRU that changed the symptoms.

**Attention:** The setup configuration on the computer you are servicing might have been customized. Running Automatic Configuration might alter the settings. Note the current configuration settings (using the View Configuration option); then, when service has been completed, verify that those settings remain in effect.

## Strategy for replacing a hard disk drive, a solid-state drive, or an mSATA solid-state drive

Always try to run a low-level format before replacing a hard disk drive. This will cause all customer data on the hard disk to be lost. Be sure that the customer has a current backup of the data before doing this task.

**Attention:** The drive startup sequence in the computer you are servicing might have been changed. Be extremely careful during write operations such as copying, saving, or formatting. If you select an incorrect drive, data or programs can be overwritten.

If the computer is equipped with both a hard disk drive and an mSATA solid-state drive, do not use the mSATA solid-state drive as a bootable device. The mSATA solid-state drive is used for the “cache” function and to support the Intel® Rapid Start Technology. We recommend that users do not replace the mSATA solid-state drive by themselves. Otherwise, the “cache” function will not work and the Intel Rapid Start Technology cannot be used any more.

**Attention:** Ensure that you partition the mSATA solid-state drive after installing it on the computer you are servicing. Otherwise, the mSATA solid-state drive will not function correctly. For instructions on how to partition an mSATA solid-state drive, go to <http://www.lenovo.com/support/msata-fru>.

## Important notice for replacing a system board

Some components mounted on a system board are very sensitive. Improper handling of a system board can cause damage to those components, and might cause a system malfunction.

**Attention:** When handling a system board:

- Do not drop a system board or apply any excessive force to it.
- Avoid rough handling of any kind.
- Avoid bending a system board and hard pushing to prevent cracking at each Ball Grid Array (BGA) chipset.

## How to use error message

Use the error codes displayed on the screen to diagnose failures. If more than one error code is displayed, begin the diagnosis with the first error code. Whatever causes the first error code might also cause false error codes. If no error code is displayed, see whether the error symptom is listed in the Symptom-to-FRU Index for the computer you are servicing.

---

## Strategy for replacing FRUs for CTO, CMV, and GAV

### Product definition

#### Dynamic Configure To Order (CTO)

This provides the ability for a customer to configure a Lenovo solution from an eSite, and have this configuration sent to fulfillment, where it is built and shipped directly to the customer. The machine label, Product Entitlement Warehouse (PEW), and eSupport will load these products as the 4-digit MT and 3-digit model, where model = “CTO” (Example: 1829-CTO).

### Custom Model Variant (CMV)

This is a unique configuration that has been negotiated between Lenovo and the customer. A unique 4-digit MT and 3-digit model is provided to the customer to place orders (Example: 1829-W15). A CMV is a special bid offering. Therefore, it is NOT generally announced.

- The MTM portion of the machine label is the 4-digit MT and 3-digit model, where model = “CTO” (Example: 1829-CTO). The PRODUCT ID portion of the machine label is the 4-digit MT and 3-digit CMV model (Example: 1829-W15).
- The PEW record is the 4-digit MT and 3-digit model, where model = “CTO” (Example: 1829-CTO).
- eSupport will show both the CTO and CMV machine type models (Example: 1829-CTO and 1829-W15 will be found on the eSupport site.)

### General Announce Variant (GAV)

This is a standard model (fixed configuration). GAVs are announced and offered to all customers. The MTM portion of the machine label is a 4-digit MT and 3-digit model, where model = a “fixed part number”, not “CTO” (Example: 1829-F1U). Also, PEW, and eSupport will list these products under the same fixed model number.

## FRU identification for CTO, CMV, and GAV products

There are two information resources to identify which FRUs are used to support CTO, CMV, and GAV products. These sources are PEW and eSupport.

### Using PEW

- **PEW** is the primary source for identifying FRU part numbers and FRU descriptions for the key commodities for CTO, CMV and GAV products at a MT - serial number level. An example of key commodities are hard disk drives, system boards, microprocessors, Liquid Crystal Displays (LCDs), and memory.
- Remember, all CTO and CMV products are loaded in PEW under the 4-digit MT and 3-digit model, where model = “CTO” (Example: 1829-CTO). GAVs are loaded in PEW under the 4-digit MT and 3-digit model, where model = a “fixed part number”, not “CTO” (Example: 1829-F1U).
- PEW can be accessed at the following Web site:  
<http://www.lenovo.com/support/site.wss/document.do?Indocid=LOOK-WARNTY>  
Select Warranty lookup. Input the MT and the Serial number and the list of key commodities will be returned in the PEW record under COMPONENT INFORMATION.

### Using eSupport

#### For key commodities (examples - hard disk drive, system board, microprocessor, LCD, and memory)

eSupport can be used to view the warranty status of key commodities built in a particular machine serial (this is the same record found in PEW). eSupport can be accessed at <http://www.lenovo.com/support>.

To view the warranty status of the key commodities on your computer, do the following:

1. Go to <http://www.lenovo.com/support>.
2. Click **Warranty & Services**.
3. Click **Check Warranty Status**.
4. On the Warranty Status Lookup page, click **Parts Lookup**.
5. Type your machine type and serial number, and then click **Submit**.

#### For the remaining FRUs (the complete list of FRUs at the MT model level)

eSupport also can be used to view the complete list of FRUs for a machine type and model.

To view the complete list of FRUs, do the following:

1. Go to <http://www.lenovo.com/support>.
2. Click **Parts & Accessories**.
3. Provide your product information or click **Launch** to automatically identify your product.
4. Click **Product & Parts Detail**.
5. On the PRODUCT AND PARTS DETAIL page, click **Parts Detail** to view the complete list of FRUs.

---

## Chapter 3. General checkout

This chapter presents following information:

- “What to do first” on page 25
- “Checkout guide” on page 26
  - “Lenovo Solution Center” on page 26
  - “Quick test programs” on page 26
  - “UEFI diagnostic program” on page 27
  - “Bootable diagnostic programs” on page 27
- “Power system checkout” on page 28

Some descriptions in this chapter might not apply to your particular computer.

Before you go to the checkout guide, be sure to read the following important notes.

### Important notes:

- **Only certified trained personnel should service the computer.**
- **Before replacing any FRU, read the entire page on removing and replacing FRUs.**
- **When you replace FRUs, it is recommended to use new nylon-coated screws.**
- **Be extremely careful during such write operations as copying, saving, or formatting.** The sequence of the drives in the computer that you are servicing might have been altered. If you select an incorrect drive, data or programs might be overwritten.
- **Replace a FRU only with another FRU of the correct model.** When you replace a FRU, ensure that the model of the machine and the FRU part number are correct.
- **A FRU should not be replaced because of a single, unreproducible failure.** Single failures can occur for a variety of reasons that have nothing to do with a hardware defect, such as cosmic radiation, electrostatic discharge, or software errors. Consider replacing a FRU only when a problem recurs. If you suspect that a FRU is defective, clear the error log and run the test again. If the error does not recur, do not replace the FRU.
- **Be careful not to replace a nondefective FRU.**

---

## What to do first

When you return a FRU, you must include the following information in the parts exchange form or parts return form that you attach to it:

1. Name and phone number of service technician
2. Date of service
3. Date on which the machine failed
4. Date of purchase
5. Failure symptoms, error codes appearing on the display, and beep symptoms
6. Procedure index and page number in which the failing FRU was detected
7. Failing FRU name and part number
8. Machine type, model number, and serial number
9. Customer's name and address

**Note:** During the warranty period, the customer is responsible for repair costs if the computer damage was caused by misuse, accident, modification, unsuitable physical or operating environment, or improper maintenance by the customer. Following is a list of some common items that are not covered under warranty and some symptoms indicates that the system has been subject to stress beyond normal use.

Before checking problems with the computer, determine whether the damage is covered under the warranty by referring to the following list:

**The following are not covered under warranty:**

- LCD panel cracked from the application of excessive force or from being dropped
- Scratched (cosmetic) parts
- Distortion, deformation, or discoloration of the cosmetic parts
- Plastic parts, latches, pins, or connectors that have been cracked or broken by excessive force
- Damage caused by liquid spilled into the system
- Damage caused by the improper insertion of a PC Card or the installation of an incompatible card
- Diskette drive damage caused by pressure on the diskette drive cover, foreign material in the drive, or the insertion of a diskette with multiple labels
- Damaged or bent diskette eject button
- Fuses blown by attachment of a nonsupported device
- Forgotten computer password (making the computer unusable)
- Sticky keys caused by spilling a liquid onto the keyboard
- Use of an incorrect ac power adapter on laptop products

**The following symptoms might indicate damage caused by nonwarranted activities:**

- Missing parts might be a symptom of unauthorized service or modification.
- If the spindle of a hard disk drive becomes noisy, it might have been subject to excessive force, or have been dropped.

---

## Checkout guide

Use the following procedures as a guide in identifying and correcting problems with the ThinkPad notebook computer.

**Note:** The diagnostic tests are intended to test only ThinkPad products. The use of non-ThinkPad products, prototype cards, or modified options can lead to false indications of errors and invalid system responses.

1. Identify the failing symptoms in as much detail as possible.
2. Verify the symptoms. Try to re-create the failure by running the diagnostic test or by repeating the operation.

## Lenovo Solution Center

The Lenovo Solution Center program enables you to troubleshoot and resolve computer problems. It combines diagnostic tests, system information collection, security status, and support information, along with hints and tips for maximum system performance.

The Lenovo Solution Center program is available for download at <http://www.lenovo.com/diags>.

To run the Lenovo Solution Center program, go to Control Panel and click **System and Security → Lenovo - System Health and Diagnostics**, and then follow the instructions on the screen.

For more information about the Lenovo Solution Center program, refer to the help information system of the program.

## Quick test programs

You can run quick test programs to troubleshoot and resolve computer problems, especially when the computer does not have the Lenovo Solution Center program installed.

Lenovo provides the following quick test programs:

- **Lenovo Hard Drive Quick Test:** Use this program to troubleshoot and resolve internal storage problems.
- **Lenovo Memory Quick Test:** Use this program to troubleshoot and resolve memory module problems.

The quick test programs are applicable on the following operating systems:

- Microsoft® Windows® 8
- Microsoft Windows 7
- Microsoft Windows XP
- Microsoft Windows Server® 2003
- Microsoft Windows Server 2008

To download and install a quick test program, go to <http://www.lenovo.com/diagnose> and follow the instructions on the Web site.

To run a test using a quick test program, do the following:

1. Go to the C:\SWTOOLS\ldiag directory.
2. Double-click the gui\_lsc\_lite.exe file.
3. When the **User Account Control** window opens, click **Yes**.
4. Select the device class to be tested.
5. Select the devices to be tested.
6. Select the test to be performed.
7. Follow the instructions on the screen to start the test. When a problem is detected, information messages are displayed. Refer to the messages to troubleshoot the problem.

## UEFI diagnostic program

A UEFI diagnostic program is preinstalled on the computer. It enables you to test memory modules and internal storage devices, view system information, and check and recover bad sectors on internal storage devices.

To run the UEFI diagnostic program, do the following:

1. Turn on the computer. If the computer cannot be turned on, go to “Power system checkout” on page 28, and check the power sources. If an error code is displayed, go to “Symptom-to-FRU index” on page 36 for error code descriptions and troubleshooting hints.
2. When the ThinkPad logo is displayed, repeatedly press and release the F10 key. The main screen of the UEFI diagnostic program is displayed.
3. Follow the instructions on the screen to use the program.

*Table 1. Items on the main screen of the UEFI diagnostic program*

Tests	Tools
<ul style="list-style-type: none"><li>• Quick Memory Test</li><li>• Quick Storage Device Test</li><li>• Exit Application</li></ul>	<ul style="list-style-type: none"><li>• System Information</li><li>• Recover Bad Sectors Tool</li></ul>

## Bootable diagnostic programs

If the computer you are servicing is not installed with the UEFI diagnostic program, you can download a bootable diagnostic program from the Lenovo Support Web site. The bootable diagnostic programs enable you to test computer memory and internal storage devices, view system information, and check and recover the internal storage devices. To use the bootable diagnostic programs, you can create a bootable diagnostic medium on a USB device or CD.

To create a bootable diagnostic medium, do the following:

1. Go to <http://www.lenovo.com/diagnose>.
2. Click **Lenovo Bootable Diagnostics**.
3. Follow the instructions on the Web site to create a bootable diagnostic medium on a USB device or CD.

To use the diagnostic medium you have created, do one of the following:

- If you have created the bootable diagnostic medium on a USB device, do the following:
  1. Attach the USB device to the computer.
  2. Turn on the computer. If the computer cannot be turned on, go to “Power system checkout” on page 28, and check the power sources. If an error code is displayed, go to “Symptom-to-FRU index” on page 36 for error code descriptions and troubleshooting hints.
  3. When the ThinkPad logo is displayed, repeatedly press and release the F12 key. When the Boot Menu window opens, release the F12 key.
  4. Use the arrow keys to select **USB HDD** and then press Enter. The diagnostic program will be launched automatically.
  5. Follow the instructions on the screen to use the diagnostic program.
- If you have created the bootable diagnostic medium on a CD, do the following:
  1. Turn on the computer. If the computer cannot be turned on, go to “Power system checkout” on page 28, and check the power sources. If an error code is displayed, go to “Symptom-to-FRU index” on page 36 for error code descriptions and troubleshooting hints.
  2. Connect an external optical drive to your computer, and insert the CD into the optical drive.
  3. Restart the computer.
  4. When the ThinkPad logo is displayed, repeatedly press and release the F12 key. When the Boot Menu window opens, release the F12 key.
  5. Use the arrow keys to select **ATAPI CDx** (x: 0, 1, ...) and then press Enter. The diagnostic program will be launched automatically.
  6. Follow the instructions on the screen to use the diagnostic program.

---

## Power system checkout

To verify a symptom, do the following:

1. Connect the ac power adapter and turn on the computer.
2. Check that power is supplied when you turn on the computer.
3. Insert a straightened paper clip into the emergency reset hole to reset the computer. Confirm the system is still powered on.
4. Turn off the computer and disconnect the ac power adapter.
5. Check that the battery pack supplies power when you turn on the computer.

If you suspect a power problem, see the appropriate one of the following power supply checkouts:

- “Checking the ac power adapter” on page 28
- “Checking operational charging” on page 29
- “Checking the battery pack” on page 29
- “Checking the backup battery” on page 29

## Checking the ac power adapter

If the computer fails only when the ac power adapter is used, do the following:

- If the power-on indicator does not turn on, check the power cord of the ac power adapter for correct continuity and installation.
- If the computer does not charge during operation, go to “Checking operational charging” on page 29

To check the ac power adapter, do the following:

1. Unplug the ac power adapter cable from the computer.
2. Measure the output voltage at the plug of the ac power adapter cable. See the following illustration:

Pin	Voltage (V dc)
1	+20
2	0
3	Ground

**Note:** Output voltage across pin 2 of the ac power adapter might differ from the one you are servicing.

3. If the voltage is not correct, replace the ac power adapter.
4. If the voltage is acceptable, replace the system board.

**Note:** Noise from the ac power adapter does not always indicate a defect.

## Checking operational charging

To check whether the battery charges properly during operation, use a discharged battery pack or a battery pack that has less than 50% of the total power remaining when installed in the computer.

Perform operational charging. If the battery status indicator or icon does not turn on, replace the battery pack.

If the charge indicator still does not turn on, replace the system board. Then reinstall the battery pack. If it is still not charged, go to the next section.

## Checking the battery pack

The battery status icon in the Windows notification area displays the percentage of battery power remaining.

To check for detailed battery status information, do the following:

- For Windows 7: Open the Power Manager program and click the **Battery** tab.
- For Windows 8: Open the Lenovo Support program and click **Battery Health**, or open the Lenovo Settings program and click **Power**.

## Checking the backup battery

To check the backup battery, do the following:

1. Disable the built-in battery. See “Disabling the built-in battery” on page 58.
2. Remove the backup battery (see “1050 Keyboard bezel, backup battery, and speaker assembly” on page 66).
3. Measure the voltage of the backup battery. See the following illustration.

Wire	Voltage (V dc)
Red	+2.5 to +3.2
Black	Ground

- If the voltage is correct, replace the system board.

- If the voltage is not correct, replace the backup battery.
- If the backup battery discharges quickly after replacement, replace the system board.

---

## Chapter 4. Related service information

This chapter presents following information:

- “Restoring the factory contents by using Recovery Disc Set” on page 31
- “Using the Windows recovery programs on the Windows 8 operating system” on page 32
- “Passwords” on page 33
- “Power management” on page 35
- “Symptom-to-FRU index” on page 36

### Service Web site:

When the latest maintenance diskette and the system program service diskette become available, they will be posted on <http://www.lenovo.com/support>.

---

## Restoring the factory contents by using Recovery Disc Set

When the hard disk drive or solid-state drive is replaced because of a failure, no product recovery program is on the new drive. In this case, you must use the Recovery Disc Set for the computer. Order the Recovery Disc Set and the drive at the same time so that you can recover the new drive with the pre-installed software when they arrive. For information on which discs to order, go to <http://www.lenovo.com/serviceparts-lookup>.

The recovery disc set consists of the user instructions and the following set of DVDs to restore the computer to the original factory configuration.

### Operating System Recovery Disc (one disc)

This disc restores the Microsoft Windows operating system. Use this disc to start the recovery process.

### Applications and Drivers Recovery Disc (one or more discs)

This disc restores the preinstalled applications and drivers on the computer.

### Supplemental Recovery Disc

This disc contains additional content, such as updates to the software that was preinstalled on the computer. Not all recovery disc sets come with a *Supplemental Recovery Disc*.

### Notes:

- You must have a DVD drive to use the recovery discs. If you do not have an internal DVD drive, you can use an external USB DVD drive.
- During the recovery process, all data on the drive will be deleted. If possible, copy any important data or personal files that you want to keep onto removable media or a network drive before you start the recovery process.

To restore the computer to the original factory configuration using the recovery disc set, do the following:

**Note:** Recovery takes several hours. The length of time depends on the method you use. If you use recovery discs, recovery takes at least five hours.

1. Make the CD/DVD drive the first startup device in the startup sequence using the following procedure:
  - a. Turn on the computer. When the logo screen is displayed, Press F1. The ThinkPad Setup program opens.

- b. Use the arrow keys to select **Startup → Boot**.
  - c. Select the CD/DVD drive as the **1st Boot Device**.
2. Insert the *Operating System Recovery Disc* into the DVD drive.
3. Press Fn+F10 to save the ThinkPad Setup configuration changes. Follow the instructions on the screen to begin the recovery process.
4. Select your language and click **Next**.
5. Read the license. If you agree with the terms and conditions, select **I accept these terms and conditions** and then click **Next**. If you do not agree with the terms and conditions, follow the instructions on the screen.
6. Click **Yes** in the displayed window to begin the operating system recovery process.
7. Insert the *Applications and Drivers Recovery Disc* when prompted and then click **OK** to begin the applications and drivers recovery process.
8. If you have a *Supplemental Recovery Disc*, insert it when prompted and click **Yes**. If you do not have a *Supplemental Recovery Disc*, click **No**.
9. When all of the data has been copied from the last disc in the set and has been processed, remove the disc and restart the computer.

**Note:** The rest of the recovery process is fully automated and no action is required. The computer will restart into the Microsoft Windows desktop several times and you might experience periods when no activity is apparent on the screen for several minutes at a time. This is normal.
10. When the recovery process is complete, the Set Up Windows screen is displayed. Follow the instructions on the screen to complete the Windows setup.
11. After you have completed the Windows setup, you might want to restore the original startup sequence. Start the ThinkPad Setup and then press Fn+F9 to restore the default settings. Press Fn+F10 to save and exit the ThinkPad Setup.

**Note:** After restoring a drive to the factory default settings, you might need to reinstall some device drivers.

---

## Using the Windows recovery programs on the Windows 8 operating system

The computer you are servicing came with built-in recovery programs provided by the Windows 8 operating system. You can use those programs to refresh or restore the computer.

### Refreshing the computer

If the computer you are servicing does not perform well and the problem might be caused by a recently installed program, you can refresh the computer without losing the customers' personal files or changing the settings.

**Attention:** If you refresh the computer, the programs that came with the computer and the programs that were installed from Windows Store will be reinstalled, but all other programs will be removed.

To refresh the computer, do the following:

1. Move your cursor to the bottom-right corner of the screen to bring up the charms. Click **Settings → Change PC settings → General**.
2. In the **Refresh your PC without affecting your files** section, click **Get started**.

### Restoring the computer to factory default settings

You can restore the computer to the factory default settings. During the process, the operating system and all programs that are shipped with the computer will be reinstalled.

**Attention:** All the personal files and settings will be deleted after you restore the computer to the factory default settings. Ensure that the user has made a backup copy of all the data before restoring the computer to the factory default settings.

To restore the computer, do the following:

1. Move your cursor to the bottom-right corner of the screen to bring up the charms. Click **Settings** → **Change PC settings** → **General**.
2. In the **Remove everything and reinstall Windows** section, click **Get started**.

### Advanced startup options

Advanced startup options enable you to change the startup settings of the Windows operating system, start the computer from an external device, or restore the Windows operating system from a system image.

To use the advanced startup options, do the following:

1. Move your cursor to the bottom-right corner of the screen to bring up the charms. Click **Settings** → **Change PC settings** → **General**.
2. In the **Advanced startup** section, click **Restart now** → **Troubleshoot** → **Advanced options**.
3. Restart the computer following the instructions on the screen.

For more details about the Windows recovery solutions, refer to the help information system of the Windows 8 operating system.

---

## Passwords

As many as three passwords might be needed for any ThinkPad notebook computer: the power-on password, the hard-disk password, and the supervisor password.

If any of these passwords has been set, a prompt for it appears on the screen whenever the computer is turned on. The computer does not start until the password is entered.

**Note:** If only the supervisor password is set, the password prompt does not appear when the operating system is booted.

### Power-on password

A power-on password protects the system from being powered on by an unauthorized person. The password must be entered before an operating system can be booted. For how to remove the power-on password, see “How to remove the power-on password” on page 34.

### Hard-disk password

There are two hard-disk passwords:

- User hard-disk password - for the user
- Master hard-disk password - for the system administrator, who can use it to get access to the hard disk even if the user has changed the user hard-disk password.

**Note:** There are two modes for the hard-disk password: **User only** and **Master + User**. The **Master + User** mode requires two hard-disk passwords; the system administrator enters both in the same operation. The system administrator then provides the user hard-disk password to the system user.

**Attention:** If the user hard-disk password has been forgotten, check whether a master hard-disk password has been set. If a master hard-disk password has been set, it can be used to access the hard disk drive. If no master hard-disk password is available, neither Lenovo nor Lenovo authorized service technicians

provide any services to reset either the user hard-disk password or the master hard-disk password, or to recover data from the hard disk drive. The hard disk drive can be replaced for a scheduled fee.

For how to remove the hard-disk password, see “How to remove the hard-disk password” on page 34.

## Supervisor password

A supervisor password protects the system information stored in the ThinkPad Setup program. The user must enter the supervisor password in order to get access to the ThinkPad Setup program and change the system configuration.

**Attention:** If the supervisor password has been forgotten and cannot be made available to the service technician, there is no service procedure to reset the password. The system board must be replaced for a scheduled fee.

## How to remove the power-on password

If no supervisor password has been set, do the following to remove the power-on password:

1. Disable the built-in battery. For how to disable the built in battery, see “Disabling the built-in battery” on page 58.
2. Remove the backup battery. For how to remove the backup battery, see “1050 Keyboard bezel, backup battery, and speaker assembly” on page 66.
3. Connect the ac power adapter and turn on the computer. Wait until the POST ends. After the POST ends, the password prompt does not appear. The power-on password has been removed.
4. Disable the built-in battery, and then reinstall the backup battery.

If a supervisor password has been set and is known to the service technician, do the following to remove the power-on password:

1. Turn on the computer.
2. When the ThinkPad logo is displayed, immediately press F1.
3. Type the supervisor password to enter the ThinkPad Setup program.
4. Select **Security**.
5. Select **Password**.
6. Select **Power-On Password**.
7. Type the current supervisor password in the **Enter Current Password** field. Then, leave the **Enter New Password** field blank, and press Enter twice.
8. In the Changes have been saved window, press Enter.
9. Press Fn+F10 to save changes and exit the ThinkPad Setup program.

## How to remove the hard-disk password

**Attention:** If **User only** mode is selected and the user hard-disk password has been forgotten and cannot be made available to the service technician, neither Lenovo nor Lenovo authorized service technicians provide any services to reset the user hard-disk passwords or to recover data from the hard disk drive. The hard disk drive can be replaced for a scheduled fee.

To remove a user hard-disk password that has been forgotten, when the master hard-disk password are known, do the following:

1. Turn on the computer.
2. When the ThinkPad logo comes up, immediately press F1 to enter ThinkPad Setup.
3. Select **Security**.
4. Select **Password**.

5. Select **Hard-disk x password**, where *x* is the letter of the hard disk drive. A pop-up window opens.
6. Select **Master HDP**.
7. Type the current master hard-disk password in the **Enter Current Password** field. Then leave the **Enter New Password** field blank, and press Enter twice.
8. Press Fn+F10 to save changes and exit the ThinkPad Setup program.
9. Select **Yes** in the Setup Notice window. Both the user hard-disk password and master hard-disk password will be removed.

---

## Power management

There are several power-saving modes, such as sleep mode, hibernation mode, and wireless off mode. These power-saving modes enable the users to conserve power at any time.

### Sleep mode

When the computer enters sleep mode, the following events occur:

- The LCD is powered off.
- The hard disk drive is powered off.
- The microprocessor stops.

In certain circumstances, the computer goes into sleep mode automatically:

- After a period of inactivity specified in power plan settings
- When the battery indicator blinks orange, indicating that the battery power is low

To return from sleep mode, do one of the following:

- Press the Fn key.
- Open the LCD cover.
- Press the power button.

Also, in either of the following events, the computer automatically returns from sleep mode and resumes operation:

- The ring indicator (RI) is signaled by a serial device or a PC Card device.
- The time set on the resume timer elapses.

**Note:** The computer does not accept any input immediately after it enters sleep mode. Wait a few seconds before taking any action to reenter operation mode.

### Hibernation mode

In hibernation mode, the following events occur:

- The system status, RAM, VRAM, and setup data are stored on the hard disk.
- The system is powered off.

If you have defined one of the following actions as the event that causes the system to go into hibernation mode, perform that action.

- Closing the lid.
- Pressing the power button.

Also, the computer goes into hibernation mode automatically after a period of inactivity specified in power plan settings.

When the power is turned on, the computer returns from hibernation mode and resumes operation. The hibernation file in the boot record on the hard disk drive is read, and system status is restored from the hard disk drive.

## Wireless off mode

In wireless off mode, the wireless features are turned off to conserve power. To turn off or turn on the wireless features, press F8.

---

## Symptom-to-FRU index

This section contains following information:

- “Numeric error codes” on page 36
- “Error messages” on page 38
- “No-beep symptoms” on page 38
- “LCD-related symptoms” on page 39
- “Intermittent problems” on page 39
- “Undetermined problems” on page 39

The symptom-to-FRU index in this section lists symptoms and errors and their possible causes. The most likely cause is listed first, in boldface type.

**Note:** Do the FRU replacement or other actions in the sequence shown in the column headed “FRU or action, in sequence.” If replacing a FRU does not solve the problem, put the original part back in the computer. Do not replace a nondefective FRU.

This index can also help you determine, during regular servicing, what FRUs are likely to need to be replaced next.

A numeric error is displayed for each error detected in POST or system operation. In the displays, **n** can be any number.

If no numeric code is displayed, check the narrative descriptions of symptoms. If the symptom is not described there, go to “Intermittent problems” on page 39.

**Note:** For a device not supported by diagnostic codes in the ThinkPad notebook computers, see the manual for that device.

## Numeric error codes

Table 2. Numeric error codes

Symptom or error	FRU or action, in sequence
<b>0177</b> Bad SVP data, stop POST task—The checksum of the supervisor password in the EEPROM is not correct.	System board.
<b>0183</b> Bad CRC of Security Settings in EFI Variable. Enter the ThinkPad Setup program.	1. <b>Run the ThinkPad Setup program, and then save current setting by pressing F10.</b> 2. System board.
<b>0187</b> EAIA data access error—The access to EEPROM is failed.	System board.
<b>0188</b> Invalid RFID Serialization Information Area.	System board.

Table 2. Numeric error codes (continued)

Symptom or error	FRU or action, in sequence
<b>0189</b> Invalid RFID configuration information area—The EEPROM checksum is not correct.	System board.
<b>0190</b> Critical low-battery error	1. <b>Charge the battery pack.</b> 2. Battery pack.
<b>0191</b> System Security—Invalid Remote Change requested.	1. <b>Run the ThinkPad Setup program, and then save current setting by pressing F10.</b> 2. System board.
<b>0199</b> System Security— Security password retry count exceeded.	1. <b>Run the ThinkPad Setup program, and then save the current setting by pressing F10.</b> 2. System board.
<b>1802</b> Unauthorized network card is plugged in—Turn off and remove the miniPCI network card.	1. <b>Remove Mini PCI network card.</b> 2. System board.
<b>1820</b> More than one external fingerprint reader is attached. Power off and remove all but the reader that you set up within your main operating system.	<b>Remove all but the reader that you set up for the authentication.</b>
<b>2000</b> ThinkVantage® Active Protection sensor diagnostics failed.	System board.
<b>2100</b> Detection error on HDD0 (Main HDD)	1. <b>Reseat the hard disk drive.</b> 2. Main hard disk drive. 3. System board.
<b>2101</b> Detection error on HDD1 (Ultrabay HDD)	1. <b>Reseat the hard disk drive.</b> 2. Ultrabay® hard disk drive. 3. System board.
<b>2102</b> Detection error on HDD2 (Mini SATA)	1. <b>Reseat the Mini SATA device.</b> 2. Mini SATA device. 3. System board.
<b>2110</b> Read error on HDD0 (Main HDD)	1. <b>Reseat the hard disk drive.</b> 2. Main hard disk drive. 3. System board.
<b>2111</b> Read error on HDD1 (Ultrabay HDD)	1. <b>Reseat the hard disk drive.</b> 2. Ultrabay hard disk drive. 3. System board.
<b>2112</b> Read error on HDD2 (Mini SATA)	1. <b>Reseat the Mini SATA device.</b> 2. Mini SATA device. 3. System board.
<b>2200</b> Machine Type and Serial Number are invalid.	System board.
<b>2201</b> Machine UUID is invalid	System board.

## Error messages

Table 3. Error messages

Symptom or error (beeps, if any)	FRU or action, in sequence
Fan error	<ol style="list-style-type: none"><li>1. <b>Fan.</b></li><li>2. Thermal grease.</li><li>3. System board.</li></ol>
Thermal sensing error	System board.
The battery installed is not supported by this system and will not charge. Please replace the battery with the correct Lenovo battery for this system. Press the ESC key to continue.	Unauthorized battery is connected to the system. Press the ESC to continue.
This system does not support batteries that are not genuine Lenovo-made or authorized. The system will continue to boot, but may not charge unauthorized batteries. <b>Attention:</b> Lenovo has no responsibility for the performance or safety of unauthorized batteries, and provides no warranties for failures or damage arising out of their use.	Replace the battery with the correct Lenovo battery for this system.

## No-beep symptoms

Table 4. No-beep symptoms

Symptom or error	FRU or action, in sequence
No beep, power-on indicator on, LCD blank, and no POST.	<ol style="list-style-type: none"><li>1. <b>Ensure that every connector is connected tightly and correctly.</b></li><li>2. System board.</li></ol>
No beep, power-on indicator on, and LCD blank during POST.	System board.
The power-on password prompt appears.	A power-on password or a supervisor password is set. Type the password and press <b>Enter</b> .
The hard-disk password prompt appears.	A hard-disk password is set. Type the password and press <b>Enter</b> .

## Beep symptoms

Table 5. Beep symptoms

Problem	Solution
One short beep, pause, three short beeps, pause, three more short beeps, and one short beep	The system board has a problem. Have the computer serviced.
Three short beeps, pause, one short beep, pause, one more short beep, and three short beeps	PCI resource allocation failure. Power off the computer and remove the PCI devices. If the beeps persist, have the computer serviced.
One long and two short beeps	The video function has a problem. Have the computer serviced.
Four cycles of four short beeps	The Security Chip has a problem. Have the computer serviced.

Table 5. Beep symptoms (continued)

Problem	Solution
Five short beeps	The system board has a problem. Have the computer serviced.
Five short beeps, pause, five short beeps, and pause	Continue to boot immediately when the error was detected.

## LCD-related symptoms

**Important:** The TFT LCD for the notebook computer contains many thin-film transistors (TFTs). The presence of a small number of dots that are missing, discolored, or always lighted is characteristic of TFT LCD technology, but excessive pixel problems can cause viewing concerns.

If the LCD you are servicing has two or less visible defective pixels, it should not be considered faulty. However, if the LCD has three or more visible defective pixels, it will be deemed as defective by Lenovo and it should be replaced.

### Notes:

- This policy applies to all ThinkPad notebook computers purchased on 1 January, 2008 or later.
- Lenovo will not provide replacement if the LCD is within specification as we cannot guarantee that any replacement LCD will have zero pixel defects.
- One pixel consists of R, G, B sub-pixels.

Table 6. LCD-related symptoms

Symptom or error	FRU or action, in sequence
No beep, power-on indicator on, and a blank LCD during POST.	System board.
<ul style="list-style-type: none"> <li>• LCD backlight not working.</li> <li>• LCD too dark.</li> <li>• LCD brightness cannot be adjusted.</li> <li>• LCD contrast cannot be adjusted.</li> </ul>	<ol style="list-style-type: none"> <li>1. <b>Reseat the LCD connectors.</b></li> <li>2. LCD assembly.</li> <li>3. System board.</li> </ol>
<ul style="list-style-type: none"> <li>• LCD screen unreadable.</li> <li>• Characters missing pixels.</li> <li>• Screen abnormal.</li> <li>• Wrong color displayed.</li> </ul>	<ol style="list-style-type: none"> <li>1. <b>See important note for “LCD-related symptoms.”</b></li> <li>2. Reseat all LCD connectors.</li> <li>3. LCD assembly.</li> <li>4. System board.</li> </ol>
Horizontal or vertical lines displayed on LCD.	LCD assembly.

## Intermittent problems

Intermittent system hang problems can be due to a variety of causes that have nothing to do with a hardware defect, such as cosmic radiation, electrostatic discharge, or software errors. FRU replacement should be considered only when a problem recurs.

## Undetermined problems

If the diagnostic tests did not identify the device that has failed, if wrong devices are installed, or if the system simply is not operating, follow these procedures to isolate the failing FRU (do not isolate FRUs that have no defects).

Verify that all attached devices are supported by the computer.

Verify that the power supply being used at the time of the failure is operating correctly. (See “Power system checkout” on page 28)

1. Turn off the computer.
2. Visually check each FRU for damage. Replace any damaged FRU.
3. Remove or disconnect all of the following devices:
  - a. Non-ThinkPad devices
  - b. Printer, mouse, and other external devices
  - c. Hard disk drive or solid-state drive
  - d. External diskette drive or optical drive
  - e. Media card
4. Turn on the computer.
5. Determine whether the problem has been solved.
6. If the problem does not recur, reconnect the removed devices one at a time until you find the failing FRU.
7. If the problem remains, replace the following FRUs one at a time (do not replace a nondefective FRU):
  - a. System board
  - b. LCD assembly

## Chapter 5. Status indicators

This chapter presents the system status indicators that show the status of the computer.

Table 7. Status indicators

Indicator	Meaning
<b>1</b> Caps Lock status indicator 	When the Caps Lock mode is enabled, this indicator will be displayed on the screen. You can enter all alphabetic characters (A-Z) in uppercase directly.
<b>2</b> Power status indicator 	<ul style="list-style-type: none"><li>• <b>Green:</b> The ac power adapter is connected. If a battery is installed on the computer, it is charged when this indicator is on.</li><li>• <b>Off:</b> The ac power adapter is not connected.</li></ul>

Table 7. Status indicators (continued)

Indicator	Meaning
<div> <div>3</div> <div>4</div> </div> <div>System status indicator</div> <div>  </div>	<p>The illuminated dot in the ThinkPad logo works as a system status indicator: it shows whether the computer is in sleep, hibernation, or normal mode.</p> <ul style="list-style-type: none"> <li>• <b>Red:</b> The computer is on (in normal mode).</li> <li>• <b>Fast blinking red:</b> The computer is entering hibernation mode.</li> <li>• <b>Slow blinking red:</b> The computer is in sleep mode.</li> <li>• <b>Off:</b> The computer is off or in hibernation mode.</li> </ul>

## Chapter 6. Special keys

The following table describes the functions of the special keys on the computer keyboard.

Table 8. Special keys

Special key	Description
Esc 	Press this key to open the ThinkPad Keyboard Properties window where you can toggle the F1-F12 key functionality.
F1 	Press this key to mute or unmute the speakers. <b>Note:</b> If you mute the sound and turn off your computer, the sound will remain muted when you turn on your computer again. To turn on the sound, press F2 or F3.
F2 	Press this key to decrease the speaker volume.
F3 	Press this key to increase the speaker volume.
F4 	Press this key to mute or unmute all of the recording devices.
F5 	You can temporarily change the computer display brightness by pressing these two keys. To change the default brightness level, right-click the battery status icon in the Windows notification area, then click <b>Adjust screen brightness</b> and make changes as desired.
F6 	
F7 	Press this key to switch the display output location between the computer display and an external monitor.
F8 	Press this key to enable or disable the Airplane mode.  The Airplane mode disables the wireless features of your computer to comply with airline regulations. When you press this key, a list of wireless connections is displayed. You can quickly turn on or turn off all the wireless network connections.
F9 	Press this key to open the <b>Settings</b> charm.
F10 	Press this key to open the <b>Search</b> charm.

Table 8. Special keys (continued)

Special key	Description
F11 	Press this key to view the programs that you have opened.
F12 	Press this key to view all the programs.
Fn+B	Has the same function as the Break key on a conventional keyboard.
Fn+K	Has the same function as the ScrLK key on a conventional keyboard.
Fn+P	Has the same function as the Pause key on a conventional keyboard.
Fn+S	Has the same function as the SysRq key on a conventional keyboard.

---

## Chapter 7. Locations

This chapter introduces the locations of the computer hardware components.

---

### Locating computer controls, connectors, and indicators

This topic introduces the locations of the computer controls, connectors, and indicators.

#### Front view

- |                                 |                                     |
|---------------------------------|-------------------------------------|
| <b>1</b> Built-in microphones   | <b>9</b> Mini DisplayPort connector |
| <b>2</b> Integrated camera      | <b>10</b> USB 3.0 connector         |
| <b>3</b> Windows button         | <b>11</b> Fan louvers               |
| <b>4</b> Ambient light sensor   | <b>12</b> System status indicator   |
| <b>5</b> Volume control buttons | <b>13</b> Touch pad                 |
| <b>6</b> Screen rotation button | <b>14</b> TrackPoint buttons        |
| <b>7</b> Power button           | <b>15</b> TrackPoint pointing stick |
| <b>8</b> ac power connector     | <b>16</b> UltraNav® pointing device |

## Rear view

**1** System status indicator

**2** Combo audio jack

**3** USB 3.0 connector

**4** HDMI connector

**5** Ethernet connector

**6** Media card reader slot

**7** SIM card slot

**8** Security keyhole

## Bottom view

**1** Hard disk drive or solid-state drive

**2** Emergency reset hole

**3** Battery pack

---

## Locating FRUs and CRUs

This topic introduces the following service parts:

- “Major FRUs and CRUs” on page 48
- “LCD FRUs” on page 50

**Notes:**

- Each FRU is available for all types or models, unless otherwise specified.

- **CRU statement for customers:**

You can resolve some problems with your product with a replacement part you can install yourself, called a “Customer Replaceable Unit” or “CRU.” Some CRUs are designated as self-service CRUs and others are designated as optional-service CRUs. *Installation of self-service CRUs is your responsibility. For optional-service CRUs, you can either install the CRU yourself or you can request that a Service Provider install the CRU according to the warranty service for your product.* If you intend on installing the CRU, Lenovo will ship the CRU to you. CRU information and replacement instructions are shipped with your product and are available from Lenovo at any time upon request. You can find a list of CRUs for your product in this *Hardware Maintenance Manual*. An electronic version of this manual can be found at <http://www.lenovo.com/support>. Click **User Guides & Manuals** and then follow the on-screen instructions to find the manual for your product. You might be required to return the defective part that is replaced by the CRU. When return is required: (1) return instructions, a prepaid shipping label, and a container will be included with the replacement CRU; and (2) you might be charged for the replacement CRU if Lenovo does not receive the defective CRU within thirty (30) days of your receipt of the replacement CRU. See your Lenovo Limited Warranty documentation for full details.

ThinkPad computers contain the following types of CRUs:

- **Self-service CRUs:** These CRUs unplug or are held by no more than two screws. Examples of these types of CRUs include the ac power adapter, power cord, battery, and hard disk drive. Other self-service CRUs depending on product design might include the wireless card, keyboard, and palm rest with finger print reader and touch pad.
- **Optional-service CRUs:** These CRUs are isolated parts within the computer that are concealed by an access panel that is typically secured by more than two screws. Once the access panel is removed, the specific CRU is visible.

## Major FRUs and CRUs

No	Description	Self-service CRU	Optional-service CRU
<b>1</b>	LCD unit	No	No
<b>2</b>	Speaker assembly	No	No
<b>3</b>	Keyboard bezel	No	No
<b>4</b>	Thermal fan assembly	No	No
<b>5</b>	DC-in connector	No	No
<b>6</b>	Base cover assembly	No	No

No	Description	Self-service CRU	Optional-service CRU
<b>7</b>	Hard disk drive or solid-state drive slot cover	Yes	No
<b>8</b>	Hard disk drive or solid-state drive	Yes	No
<b>9</b>	Battery pack	No	No
<b>10</b>	Proximity sensors	No	No
<b>11</b>	Hard disk drive connector	No	No
<b>12</b>	System board	No	No
<b>13</b>	PCI Express Mini card for wireless LAN	No	Yes
<b>14</b>	mSATA solid-state drive (on some models)	No	No
<b>15</b>	PCI Express Mini card for wireless WAN (on some models)	No	Yes
<b>16</b>	Backup battery	No	No
<b>17</b>	Keyboard	Yes	No
<b>18</b>	TrackPoint cap	Yes	No

## LCD FRUs

No	Description	Self-service CRU	Optional-service CRU
<b>1</b>	Button bezel	No	No
<b>2</b>	LCD panel	No	No
<b>3</b>	Integrated camera	No	No
<b>4</b>	Wireless antenna assembly	No	No
<b>5</b>	Power cable assembly	No	No
<b>6</b>	LCD rear cover assembly	No	No
<b>7</b>	LCD cable assembly	No	No

No	Description	Self-service CRU	Optional-service CRU
<b>8</b>	Hinge	No	No
<b>9</b>	Button board	No	No

---

## Looking up FRU information

For detailed FRU information, including part numbers, descriptions, and substitution part numbers, go to <http://www.lenovo.com/serviceparts-lookup>.

---

## Chapter 8. FRU replacement notices

This chapter presents notices related to removing and replacing parts. Read this chapter carefully before replacing any FRU.

### Notes:

- Each FRU is available for all types or models, unless otherwise specified.
- **CRU statement for customers:**  
You can resolve some problems with your product with a replacement part you can install yourself, called a “Customer Replaceable Unit” or “CRU.” Some CRUs are designated as self-service CRUs and others are designated as optional-service CRUs. *Installation of self-service CRUs is your responsibility. For optional-service CRUs, you can either install the CRU yourself or you can request that a Service Provider install the CRU according to the warranty service for your product.* If you intend on installing the CRU, Lenovo will ship the CRU to you. CRU information and replacement instructions are shipped with your product and are available from Lenovo at any time upon request. You can find a list of CRUs for your product in this *Hardware Maintenance Manual*. An electronic version of this manual can be found at <http://www.lenovo.com/support>. Click **User Guides & Manuals** and then follow the on-screen instructions to find the manual for your product. You might be required to return the defective part that is replaced by the CRU. When return is required: (1) return instructions, a prepaid shipping label, and a container will be included with the replacement CRU; and (2) you might be charged for the replacement CRU if Lenovo does not receive the defective CRU within thirty (30) days of your receipt of the replacement CRU. See your Lenovo Limited Warranty documentation for full details.

---

## Screw notices

Loose screws can cause a reliability problem. In the ThinkPad notebook computer, this problem is addressed with special nylon-coated screws that have the following characteristics:

- They maintain tight connections.
- They do not easily come loose, even with shock or vibration.
- They are harder to tighten.

Do the following when you service this machine:

- Keep the screw kit in your tool bag. For the part number of the screw kit, go to <http://www.lenovo.com/serviceparts-lookup>.
- It is recommended to use new screws.
- It is recommended to use each screw only once.
- Use a torque screwdriver if you have one.

Tighten screws as follows:

- **Plastic to plastic**

Turn an additional 90 degrees after the screw head touches the surface of the plastic part.

- **Logic card to plastic**

Turn an additional 180 degrees after the screw head touches the surface of the logic card.

#### Notes:

- Ensure that you use the correct screw. It is recommended to use new screws for replacements.
- If you have a torque screwdriver, tighten all screws firmly to the torque specified in the screw information table for each step.
- Ensure that the torque screw drivers are calibrated correctly following the country specifications.

---

## Retaining serial numbers

This section includes the following descriptions:

- “Restoring the serial number of the system unit” on page 54
- “Retaining the UUID” on page 55
- “Reading or writing the ECA information” on page 55

## Restoring the serial number of the system unit

When the computer was manufactured, the EEPROM on the system board was loaded with the serial numbers of the system and all major components. These numbers need to remain the same throughout the life of the computer.

If you replace the system board, you must restore the serial number of the system unit to its original value.

Before replacing the system board, save the original serial number by doing the following:

1. Install the LENOVO ThinkPad Hardware Maintenance Diskette Version 1.76 or later, and restart the computer.
2. From the main menu, select **1. Set System Identification**.
3. Select **2. Read S/N data from EEPROM**. The serial number of the system unit is listed as **20: Serial number**.
4. Write down that number.

**Note:** The serial number of the system unit also is written on the label attached to the bottom of the computer.

After you have replaced the system board, restore the serial number by doing the following:

1. Install the LENOVO ThinkPad Hardware Maintenance Diskette Version 1.76 or later and restart the computer.
2. From the main menu, select **1. Set System Identification**.
3. Select **1. Add S/N data from EEPROM**. Follow the instructions on the screen.

If the MTM and Product ID numbers differ from each other on the rear label, use what is shown for the Product ID field. See example below:

#### MTM on rear label:

TTTT-CTO S/N SSSSSSS

## Product ID on rear label:

TTTT-MMM (Use this number when setting Serial Number)

In the example, the Serial Number to be input is "1STTTTMMMSSSSSSSS".

## Retaining the UUID

The Universally Unique Identifier (UUID) is a 128-bit number uniquely assigned to your computer at production and stored in the EEPROM of your system board. The algorithm that generates the number is designed to provide unique IDs until the year A.D. 3400. No two computers in the world have the same number.

When you replace the system board, you must set the UUID on the new system board by doing the following:

1. Install the LENOVO ThinkPad Hardware Maintenance Diskette Version 1.76 or later, and restart the computer.
2. From the main menu, select **4. Assign UUID**. A new UUID is created and written. If a valid UUID already exists, it is not overwritten.

## Reading or writing the ECA information

Information on Engineering Change Announcements (ECA) are stored in the EEPROM of the system board. The electronic storage of this information simplifies the procedure to check if the ECA has been previously applied to a machine. The machine does not need to be disassembled to check for the ECA application.

To check what ECAs have been previously applied to the machine, use the ECA Information Read/Write function on the LENOVO ThinkPad Hardware Maintenance Diskette Version 1.76 or later.

1. Insert the LENOVO ThinkPad Hardware Maintenance Diskette Version 1.76 or later, and restart the computer.
2. From the main menu, select **6. Set ECA Information**.
3. To read the ECA information, select **2. Read ECA/rework number from EEPROM** and follow the instructions on the screen.
4. To read the box build date, select **5. Read box build date from EEPROM**, and follow the instructions on the screen.

After an ECA has been applied to the machine, the EEPROM must be updated to reflect the ECA's application. Use the LENOVO ThinkPad Hardware Maintenance Diskette Version 1.76 or later to update the EEPROM.

**Note:** Only the ECA number is stored in the EEPROM. The machine type of the ECA is assumed to be the same as the machine type of the machine that had the ECA applied to it.

1. Insert the LENOVO ThinkPad Hardware Maintenance Diskette Version 1.76 or later, and restart the computer.
2. From the main menu, select **6. Set ECA Information**.
3. To write the ECA information, select **1. Write ECA/rework number from EEPROM**, and follow the instructions on the screen.
4. To write the box build date, select **4. Write box build date from EEPROM**, and follow the instructions on the screen.

If the system board is being replaced, try to read the ECA information from the old system board and transfer the information to the new system. If the system board is inoperable, this will not be possible.

---

## Chapter 9. Removing or replacing a FRU

This chapter provides instructions on how to remove or replace a FRU.

### CRU statement for customers:

You can resolve some problems with your product with a replacement part you can install yourself, called a “Customer Replaceable Unit” or “CRU.” Some CRUs are designated as self-service CRUs and others are designated as optional-service CRUs. *Installation of self-service CRUs is your responsibility. For optional-service CRUs, you can either install the CRU yourself or you can request that a Service Provider install the CRU according to the warranty service for your product.* If you intend on installing the CRU, Lenovo will ship the CRU to you. CRU information and replacement instructions are shipped with your product and are available from Lenovo at any time upon request. You can find a list of CRUs for your product in this *Hardware Maintenance Manual*. An electronic version of this manual can be found at <http://www.lenovo.com/support>. Click **User Guides & Manuals** and then follow the on-screen instructions to find the manual for your product. You might be required to return the defective part that is replaced by the CRU. When return is required: (1) return instructions, a prepaid shipping label, and a container will be included with the replacement CRU; and (2) you might be charged for the replacement CRU if Lenovo does not receive the defective CRU within thirty (30) days of your receipt of the replacement CRU. See your Lenovo Limited Warranty documentation for full details.

### General guidelines:

When removing or replacing a FRU, be sure to observe the following general guidelines:

1. Do not try to service any computer unless you have been trained and certified. An untrained person runs the risk of damaging parts.
2. Before replacing any FRU, review Chapter 8 “FRU replacement notices” on page 53.
3. Begin by removing any FRUs that have to be removed before replacing the failing FRU. Such FRUs are listed at the beginning of each FRU replacement procedure. Remove them in the order in which they are listed.
4. Follow the correct sequence in the steps for removing a FRU, as given in the drawings by the numbers in square callouts.
5. When turning a screw, turn it in the direction as given by the arrow in the drawing.
6. When removing a FRU, move it in the direction as given by the arrow in the drawing.
7. To put the new FRU in place, reverse the removal procedure and follow any notes that pertain to replacement.
8. When replacing a FRU, use the correct screws as shown in the replacement procedure.

### DANGER

**Before removing any FRU, disable the built-in battery. See “Disabling the built-in battery” on page 58.**

**Attention:** After replacing a FRU, do not turn on the computer until you have ensured that all screws, springs, and other small parts are in place and none are loose inside the computer. Verify this by shaking the computer gently and listening for rattling sounds. Metallic parts or metal flakes can cause electrical short circuits.

**Attention:** The system board is sensitive to, and can be damaged by, electrostatic discharge. Before touching it, establish personal grounding by touching a ground point with one hand or by using an electrostatic discharge (ESD) strap.

---

## Before servicing the computer

Carefully read this topic before servicing the computer.

### Disabling the built-in battery

Before replacing any FRU, ensure that you have disabled the built-in battery by doing the following:

1. Turn off your computer and disconnect the ac power adapter and all cables from the computer.
2. Turn on your computer. Press F1 to enter ThinkPad Setup when the ThinkPad logo is displayed.
3. Select **Config** → **Power**. The **Power** submenu is displayed.
4. Select **Disable built-in battery**.
5. Click **Yes** in the Setup Warning window. Then the computer will be turned off automatically. Wait three to five minutes to let the computer cool.

### Removing the SIM card

If the computer you are servicing has the SIM card installed, remove it before servicing.

To remove the SIM card, disable the built-in battery first. See “Disabling the built-in battery” on page 58.

After you finish the servicing, ensure that you insert the card back into the slot firmly.

---

## 1010 Hard disk drive or solid-state drive

### Attention:

- Do not drop the drive or apply any physical shock to it. The drive is sensitive to physical shock. Improper handling can cause damage and permanent loss of data.
- Before removing the drive, have the user make a backup copy of all the information on it if possible.
- Never remove the drive while the computer is operating or in suspend mode.

### Removal steps of hard disk drive or solid-state drive

Loosen the screw **1**, and then remove the hard disk drive or solid-state drive slot cover **2**.

Remove the hard disk drive or solid-state drive with bracket from the computer **3**.

**Removal steps of hard disk drive or solid-state drive bracket**

Step	Screw (quantity)	Color	Torque
<b>1</b>	M3 × 3 mm, flat-head, nylon-coated (4)	Silver	0.3± 0.05 Nm (4.00 kgf-cm)

## 1020 Keyboard

### Removal steps of keyboard

Step	Screw (quantity)	Color	Torque
<b>1</b>	M2 × 5 mm, wafer-head, nylon-coated (2)	Black	0.181 Nm (1.85 kgf-cm)

Press the keyboard in the direction shown by the arrows **2** until the rear edge of the keyboard is detached from the keyboard bezel.

**When installing:**

1. Attach the connectors firmly.
2. Attach the keyboard and ensure that the hooks on the front edge of the keyboard are under the frame.

3. When the front edge of the keyboard is housed firmly, gently press the keys with your palms and slightly slide the keyboard toward you until the keyboard is in place.
4. Secure the keyboard by tightening the screws from the bottom side of the computer.

## 1030 PCI Express Mini Card for wireless LAN

For access, remove this FRU:

- “1020 Keyboard” on page 60

### Removal steps of PCI Express Mini Card for wireless LAN

In step **1**, unplug the connectors by using the removal tool antenna RF connector or pick the connectors with your fingers and gently unplug them in the direction of the arrows.

Step	Screw (quantity)	Color	Torque
<b>2</b>	M2 × 3 mm, wafer-head, nylon-coated (1)	Silver	0.181 Nm (1.85 kgf-cm)

**When installing:** Plug the gray cable into the main connector, and the black cable into the auxiliary connector.

### 1040 PCI Express Mini Card for wireless WAN or mSATA solid-state drive

For access, remove this FRU:

- “1020 Keyboard” on page 60

### Removal steps of PCI Express Mini Card for wireless WAN

In step **1**, unplug the connectors by using the removal tool antenna RF connector or pick the connectors with your fingers and gently unplug them in the direction of the arrows.

Step	Screw (quantity)	Color	Torque
<b>2</b>	M2 × 3 mm, wafer-head, nylon-coated (1)	Silver	0.181 Nm (1.85 kgf-cm)

**When installing:** Plug the orange cable into the main connector, and the blue cable into the auxiliary connector.

### Removal steps of mSATA solid-state drive

The computer comes with either a PCI Express Mini Card for wireless WAN or an mSATA solid-state drive. If the computer is equipped with an mSATA solid-state drive, it is installed in the wireless WAN card slot.

#### Attention:

- Do not drop the drive or apply any physical shock to it. The drive is sensitive to physical shock. Improper handling can cause damage and permanent loss of data.
- Before removing the drive, have the user make a backup copy of all the information on it if possible.
- Never remove the drive while the computer is operating or in suspend mode.
- Ensure that you partition the mSATA solid-state drive after installing it on the computer you are servicing. Otherwise, the mSATA solid-state drive will not function correctly. For instructions on how to partition an mSATA solid-state drive, go to <http://www.lenovo.com/support/msata-fru>.

Step	Screw (quantity)	Color	Torque
<b>1</b>	M2 × 3 mm, wafer-head, nylon-coated (1)	Silver	0.181 Nm (1.85 kgf-cm)

## 1050 Keyboard bezel, backup battery, and speaker assembly

For access, remove these FRUs in order:

- “1010 Hard disk drive or solid-state drive” on page 58
- “1020 Keyboard” on page 60

### Removal steps of keyboard bezel

Step	Screw cap	Screw (quantity)	Color	Torque
<b>1</b>		M2 × 5 mm, wafer-head, nylon-coated (1)	Black	0.181 Nm (1.85 kgf-cm)
<b>2</b>		M2 × 5 mm, wafer-head, nylon-coated (8)	Black	0.181 Nm (1.85 kgf-cm)

Step	Screw (quantity)	Color	Torque
<b>3</b>	M2 × 3 mm, wafer-head, nylon-coated (7)	Silver	0.181 Nm (1.85 kgf-cm)

#### When installing:

- Ensure that the connectors are attached firmly.
- When you route the cables, ensure that they are not subject to any tension. Tension could cause the cables to be damaged by the cable guides, or a wire to be broken.

Remove the hinge cap **9**.

Rotate the LCD unit in the direction shown by the arrow **10**.

Detach the latches **11**. Then remove the keyboard bezel in the direction shown by the arrow **12**.

Removal step of backup battery

Use only the authorized battery specified for your computer. Any other battery could ignite or explode.

Removal steps of speaker assembly

Step	Screw (quantity)	Color	Torque
1	M2 × 3 mm, Outside Diameter 8 mm, wafer-head, nylon-coated (4)	Black	0.181 Nm (1.85 kgf-cm)

1060 Battery pack

- For access, remove these FRUs in order:
- “1010 Hard disk drive or solid-state drive” on page 58
  - “1020 Keyboard” on page 60
  - “1050 Keyboard bezel, backup battery, and speaker assembly” on page 66

#### Important notices for replacing a battery pack:

- This system supports only batteries specially designed for this specific system and manufactured by Lenovo or an authorized builder. The system does not support unauthorized batteries or batteries designed for other systems. If an unauthorized battery or a battery designed for another system is installed, the system will not charge.

**Attention:** Lenovo has no responsibility for the performance or safety of unauthorized batteries, and provides no warranties for failures or damage arising out of their use.

- The Lenovo Solution Center program provides an automatic battery diagnostic test that determines if the battery pack is defective. A battery pack FRU should not be replaced unless this diagnostic test shows that the battery is defective. The only exception to this is if the battery pack is physically damaged or a customer is reporting a possible safety issue.
- If the Lenovo Solution Center program is not installed in the computer, the customer should download this program before a non-physically damaged battery pack is replaced. Note that a physically damaged battery pack is not covered by the warranty.

**Note:** Before removing the battery, insert a straightened paper clip into the emergency reset hole to reset the computer.

#### Removal steps of battery pack

**Use only the authorized battery specified for your computer. Any other battery could ignite or explode.**

Step	Screw (quantity)	Color	Torque
<b>2</b>	M2 × 3 mm, wafer-head, nylon-coated (1)	Silver	0.181 Nm (1.85 kgf-cm)

## 1070 Proximity sensors

For access, remove these FRUs in order:

- “1010 Hard disk drive or solid-state drive” on page 58
- “1020 Keyboard” on page 60

- “1050 Keyboard bezel, backup battery, and speaker assembly” on page 66
- “1060 Battery pack” on page 69

Removal steps of proximity sensors

Step	Screw (quantity)	Color	Torque
2	M2 × 3 mm, wafer-head, nylon-coated (2)	Silver	0.181 Nm (1.85 kgf-cm)

**When installing:** Ensure that the connectors are attached firmly to the system board.

---

## 1080 Thermal fan assembly and hard disk drive or solid-state drive connector

For access, remove these FRUs in order:

- “1010 Hard disk drive or solid-state drive” on page 58
- “1020 Keyboard” on page 60
- “1050 Keyboard bezel, backup battery, and speaker assembly” on page 66
- “1060 Battery pack” on page 69

### Removal steps of thermal fan assembly

**When installing:** Ensure that the connector is attached firmly.

Loosen the screws **2** in ascending alphabetical order as illustrated. When attaching the thermal fan assembly, secure the screws in reverse order.

**When installing:** Before you attach the thermal fan assembly to the computer, apply thermal grease, at an amount of 0.2 grams. Either too much or too less application of grease can cause a thermal problem due to imperfect contact with a component.

#### Removal steps of hard disk drive or solid-state drive connector

Step	Screw (quantity)	Color	Torque
<b>1</b>	M2 × 3 mm, wafer-head, nylon-coated (2)	Silver	0.181 Nm (1.85 kgf-cm)

**When installing:** Ensure that the hard disk drive or solid-state drive connector is attached firmly.

### 1090 LCD unit

For access, remove these FRUs in order:

- “1010 Hard disk drive or solid-state drive” on page 58

- “1020 Keyboard” on page 60
- “1050 Keyboard bezel, backup battery, and speaker assembly” on page 66
- “1060 Battery pack” on page 69

**Removal steps of LCD unit**

Step	Screw (quantity)	Color	Torque
3	M2.5 × 4 mm, wafer-head, nylon-coated (2)	Silver	0.181 Nm (1.85 kgf-cm)

In step **4**, detach the wireless antennas, and release the cables from the cable guides.

**When installing:**

- Ensure that you attach the connectors firmly in the following order:
  - 1** Wireless WAN auxiliary connector
  - 2** Wireless LAN main connector
  - 3** Wireless LAN auxiliary connector
  - 4** Wireless WAN main connector
  - 5** LCD cable assembly
  - 6** Power cable assembly
- When you route the cables, ensure that they are not subject to any tension. Tension could cause the cables to be damaged by the cable guides, or a wire to be broken.

Step	Screw (quantity)	Color	Torque
<b>5</b>	M2.5 × 4 mm, wafer-head, nylon-coated (2)	Silver	0.181 Nm (1.85 kgf-cm)

Step	Screw cap	Screw (quantity)	Color	Torque
<b>6</b>		M2.5 × 3 mm, wafer-head, nylon-coated (2)	Silver	0.181 Nm (1.85 kgf-cm)

## 1100 DC-in connector

For access, remove these FRUs in order:

- “1010 Hard disk drive or solid-state drive” on page 58
- “1020 Keyboard” on page 60
- “1050 Keyboard bezel, backup battery, and speaker assembly” on page 66
- “1060 Battery pack” on page 69
- “1090 LCD unit” on page 73

### Removal steps of DC-in connector

Step	Screw (quantity)	Color	Torque
<b>2</b>	M2 × 3 mm, wafer-head, nylon-coated (1)	Silver	0.181 Nm (1.85 kgf-cm)

**When installing:** Ensure that the connector is attached firmly.

## 1110 System board and base cover assembly

### Important notices for handling the system board

When handling the system board, bear the following in mind:

- The system board has an accelerometer, which can be broken if several thousands of G-forces are applied.

**Note:** Dropping a system board from a height of as little as six inches so that it falls flat on a hard bench can subject the accelerometer to as much as 6,000 G's of shock.

- Be careful not to drop the system board on a bench top that has a hard surface, such as metal, wood, or composite.
- If a system board is dropped, be sure to document the drop in any reject report, and replace the system board.
- Avoid rough handling of any kind.
- At every point in the process, be sure not to drop or stack the system board.
- If you put a system board down, be sure to put it only on a padded surface such as an ESD mat or a corrugated conductive surface.

For access, remove these FRUs in order:

- “1010 Hard disk drive or solid-state drive” on page 58
- “1020 Keyboard” on page 60
- “1030 PCI Express Mini Card for wireless LAN” on page 62
- “1040 PCI Express Mini Card for wireless WAN or mSATA solid-state drive” on page 63
- “1050 Keyboard bezel, backup battery, and speaker assembly” on page 66
- “1100 DC-in connector” on page 77
- “1070 Proximity sensors” on page 70
- “1060 Battery pack” on page 69
- “1080 Thermal fan assembly and hard disk drive or solid-state drive connector” on page 72
- “1090 LCD unit” on page 73

### Removal steps of system board and base cover assembly

**Attention:** The following components soldered on the system board are extremely sensitive. When you service the system board, avoid any kind of rough handling.

- a** Platform Controller Hub (PCH)
- b** Microprocessor
- c** Accelerometer chip for the hard disk drive Active Protection System™

Step	Screw (quantity)	Color	Torque
<b>1</b>	M2 × 2.5 mm, wafer-head, nylon-coated (3)	Black	0.181 Nm (1.85 kgf-cm)

### Applying labels to the base cover

The new base cover FRU is shipped with a kit containing the following label. Apply the label listed when you replace the base cover.

- 1** Machine type and serial number label

For the labels which are not shipped with the new base cover, peel them off from the old base cover, and adhere them to the new one.

The following illustration shows the location of each label.

<b>2</b> FCC label	<b>11</b> Indonesia rating label
<b>3</b> GEO label	<b>12</b> Taiwan NCC ID label for wireless WAN
<b>4</b> Genuine Microsoft label	<b>13</b> China wireless WAN label
<b>5</b> Wireless WAN IMEI label	<b>14</b> Brazil Anatel labels
<b>6</b> Ericsson label	<b>15</b> Indonesia Postel labels
<b>7</b> China Telecom label	<b>16</b> SIRIM labels
<b>8</b> China Mobile label	<b>17</b> Asset tag
<b>9</b> Israel Homo label for wireless LAN	<b>18</b> Hard disk drive warranty label
<b>10</b> Non-encryption label	

---

## 2010 Button bezel

### Removal steps of button bezel

Step	Screw cap	Screw (quantity)	Color	Torque
<b>1</b>		M2 × 5 mm, wafer-head, nylon-coated (2)	Silver	0.181 Nm (1.85 kgf-cm)
<b>2</b>		M2.5 × 4 mm, wafer-head, nylon-coated (2)	Silver	0.181 Nm (1.85 kgf-cm)

Lift the button bezel slightly as shown by the arrow **3**. Then detach the latches **4** in ascending alphabetical order as illustrated.

**When installing:** Ensure that all the latches are attached firmly and the button bezel is secured with screws.

---

## 2020 LCD panel

For access, remove this FRU:

- “2010 Button bezel” on page 81

## Removal steps of LCD panel

Step	Screw (quantity)	Color	Torque
<b>1</b>	M2 × 3.5 mm, wafer-head, nylon-coated (4)	Silver	0.181 Nm (1.85 kgf-cm)

**When installing:** Ensure that the connectors are attached firmly.

## 2030 Button board

For access, remove these FRUs in order:

- “2010 Button bezel” on page 81
- “2020 LCD panel” on page 81

## Removal steps of button board

Step	Screw (quantity)	Color	Torque
1	M2 × 3 mm, wafer-head, nylon-coated (2)	Silver	0.181 Nm (1.85 kgf-cm)

**When installing:** Ensure that the connector is attached firmly.

## 2040 Integrated camera

For access, remove these FRUs in order:

- “2010 Button bezel” on page 81
- “2020 LCD panel” on page 81

## Removal steps of integrated camera

**When installing:** Ensure that the connector is attached firmly.

## 2050 Hinge

For access, remove these FRUs in order:

- “1010 Hard disk drive or solid-state drive” on page 58
- “1020 Keyboard” on page 60
- “1050 Keyboard bezel, backup battery, and speaker assembly” on page 66
- “1060 Battery pack” on page 69
- “1090 LCD unit” on page 73
- “2010 Button bezel” on page 81

## Removal steps of hinge

Step	Screw (quantity)	Color	Torque
<b>1</b>	M2.5 × 4 mm, wafer-head, nylon-coated (2)	Silver	0.181 Nm (1.85 kgf-cm)

**When installing:**

- When you pull the cables through the hole in the hinge, route the cables as shown in the following illustration.

**1** Power cable assembly

**2** Wireless WAN auxiliary antenna

**3** Wireless LAN main antenna

**4** Wireless WAN main antenna

**5** Wireless LAN auxiliary antenna

**6** LCD cable assembly

- When you attach the LCD unit to the base cover assembly, route the cables as shown in the following illustration.

**1** LCD cable assembly

**2** Wireless LAN auxiliary antenna

**3** Wireless WAN main antenna

**4** Wireless LAN main antenna

**5** Wireless WAN auxiliary antenna

**6** Power cable assembly

---

## 2060 Wireless antenna assembly, LCD cable assembly, power cable assembly, and LCD rear cover assembly

For access, remove these FRUs in order:

- “1010 Hard disk drive or solid-state drive” on page 58
- “1020 Keyboard” on page 60
- “1050 Keyboard bezel, backup battery, and speaker assembly” on page 66
- “1060 Battery pack” on page 69
- “1090 LCD unit” on page 73
- “2010 Button bezel” on page 81
- “2020 LCD panel” on page 81
- “2030 Button board” on page 82
- “2040 Integrated camera” on page 83
- “2050 Hinge” on page 84

### Removal steps of wireless antenna assembly

Release the wireless antenna cables from the cable guides.

**When installing:** As you route the cables, ensure that they are not subject to any tension. Tension could cause the cables to be damaged by the cable guides, or a wire to be broken.

- a** Wireless LAN antenna (main)
- b** Wireless WAN antenna (auxiliary)
- c** Wireless WAN antenna (main)
- d** Wireless LAN antenna (auxiliary)

**Note:** Some models might not have the wireless WAN antennas.

**Removal step of LCD cable assembly, power cable assembly, and LCD rear cover assembly**

---

## Appendix A. Notices

Lenovo may not offer the products, services, or features discussed in this document in all countries. Consult your local Lenovo representative for information on the products and services currently available in your area. Any reference to a Lenovo product, program, or service is not intended to state or imply that only that Lenovo product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any Lenovo intellectual property right may be used instead. However, it is the user's responsibility to evaluate and verify the operation of any other product, program, or service.
